#WrocławTECH

Wrocław University
of Science and Technology

WELCOME

to your custom Prospectus of Wrocław University of Science and Technology (Wrocław Tech). It contains information relevant to your interests in future education.

By viewing the individual course pages you will find specific information on courses available in English as a medium of instruction and admission details you will need, such as: the programme's duration, the deadline for application and the start date. You can also find sections on job prospects and courses you will attend during your studies. We hope you find it both useful and interesting.

For more information check also our ADMISSION GUIDE.

MASTER'S DEGREE PROGRAMMES

PREPARATORY LANGUAGE COURSES

WROCŁAW – A GREAT PLACE TO BE

Wrocław is the best choice if you are looking for a place to study. A great atmosphere, a large job market, academic staff, rich cultural and entertainment offer of the city that meets students' needs – all this contributes to the strength of Wrocław.

Wrocław is a city with beautiful architecture and plentiful green areas situated on the Odra river on 12 islands connected by over 100 bridges. Wrocław, today the administrative, educational, business and cultural capital of the Lower Silesia region, is a city with a rich history. The city is situated close to the borders with Germany and the Czech Republic.

WROCŁAW TECH – A GREAT PLACE TO STUDY

Wrocław University of Science and Technology is one of the leading scientific and educational centres in Poland. Its position among technical universities in the world strengthens every year. Wrocław Tech was founded in 1945 but it has over 160 years of intellectual heritage from Lviv University of Technology and technological heritage from Technische Hohschule Breslau.

About 21 000 students study at Wrocław Tech and the number of academic staff is over 2200. There are students from over 60 countries and cooperation agreements signed with more than 120 tertiary institutions from nearly 40 countries. The university is proud to have a lot of students and staff exchanges under Erasmus+ Programme, 400 partner universities, 8 certified laboratories, 540 teaching rooms and lecture halls, over 1000 didactic and research laboratories.

At the university, there are numerous student organisations and associations. Students have an opportunity to develop their scientific and creative passions.

Thanks to Wrocław Tech the city appears to be the capital of Polish computer science. This is partly a result of the European standards of teaching and research conducted by the university employees. The world level of scientific research and excellent equipment in laboratories lead to cooperation with many Polish and foreign companies.

All of this allows you to get a degree recognized across European Union, design your study path and choose speciality, do simulating and rewarding research on new technologies such as: nanotechnology, biotechnology, telecommunications, teleinformatics and information systems, as well as gain valuable experience and technical background.

With Wrocław Tech – nothing is impossible!

OPPORTUNITIES AND POTENTIAL

Wrocław has created a favorable ground for diversified business. It is the largest R&D centre in Poland for global companies, such as: **LG, Philips, Volvo, Bosch, Hewlett-Packard, Nokia Solutions and Networks, Wabco, KGHM, Ryanair, Credit Suisse, BNY Mellon, Google, IBM.**

Wrocław Tech 's **Career Office** prepare students and graduates to enter the labour market. It provides students with job or internship offers, consults CV, supports interesting projects, organizes meetings with employers, advises in trainings and workshops.

Moreover, Wrocław Tech has contacts with many educational and research institutions which facilitates pursuing part of your studies outside Poland. Wrocław Tech is involved, among others, in the following projects: **Erasmus +, Student Exchange Programmes, the Double Degree Master Programme T.I.M.E, the Polish and American Fullbright Commission, DAAD, Vulcanus in Japan, CEEPUS.** Wrocław University of Science and Technology is in cooperation with about 200 partners from about 50 countries. All of this can enhance your future career for sure. Obviously you don't have to limit yourself to Wrocław only, our graduates can be found all over the world, working for renowned companies or having set up their own businesses.

SCHOLARSHIPS

- Study in Wrocław **www.study-in-wroclaw.pl**
- NAWA Scholarship Programmes **www.nawa.gov.pl**
- Solaris at Wrocław Tech **rekrutacja.pwr.edu.pl/solaris**

unite! University Network for Innovation, Technology and Engineering

As a student of Wrocław University of Science and Technology, you become part of a prestigious European academic community. Our membership in the Unite! (University Network for Innovation, Technology and Engineering) opens up access to education without borders, bringing together the strengths of nine leading technical universities across Europe. This is a unique opportunity to enrich your degree with international experience, develop future-ready skills, and build a career on a global scale.

Discover the key advantages of the alliance:

International expertise at your fingertips

Exclusive access to international training sessions, workshops, and lectures led by leading experts from across Europe – from Scandinavia to the Mediterranean. This direct connection to global specialists gives you fresh perspectives and practical insights that go far beyond the standard curriculum.

Flexible mobility options

Choose how you gain international experience – from Blended Intensive Programmes (BIPs), combining short on-site exchanges with online collaboration, to

longer study visits and a wide range of virtual learning opportunities across partner universities.

Direct funding for your ideas

Apply for the Unite! Seed Fund to receive financial support for student-led initiatives, or research projects.

Multicultural networking

Build lasting connections with peers and industry experts from across Europe, preparing you for a career in international research and innovation environments.

BACHELOR'S DEGREE PROGRAMMES

DESCRIPTION

The Applied Computer Science programme educates computer science engineers with extensive knowledge and skills over seven semesters of a Bachelor's programme. Graduates have professional qualifications in programming languages, effective programming techniques, advanced programming methods and tools, software design, programming project management, database design, business data modelling and analysis, computer networks, the Internet of Things, cybersecurity, distributed systems, cloud programming and artificial intelligence.
They also have a solid grounding in the basic sciences, including higher mathematics and physics, which are essential for solving engineering problems. An important complement to the education of an IT engineer is knowledge of the ethical and legal aspects of IT.
Soft skills, such as the ability to present the results of one's own work and the ability to work in a team, play an important role in the education of computer science engineers.

ABOUT STUDIES

» **Duration:** 7 semesters
» **Mode of study:** Full time
» **Language of instruction:** English
» **Start date:** October 2026
» **Programme coordinator:**
Elżbieta Kukla, PhD

JOB PROSPECTS

Employment in companies that build, deploy and maintain IT tools and systems, particularly career in project teams, especially programming teams, in organisations and companies using software tools and methods, as well as continuing studies at the Master's level.

ENTRY INFORMATION

Requirements: secondary school certificate, received after the completion of a recognised secondary school (total 12 years of education), being the equivalent of Polish Matriculation certificate.
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

» **Deadline for application**
» **Tuition fee**
» **Application fee**
» **English Language**
» **Requirements**

admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, 71 320 38 96

CONTENT

Students are required to complete 2,655 hours of coursework (equivalent to 210 ECTS credits). The programme consists of lectures and practical activities, including laboratories, tutorials, seminars and projects. Students must receive credits for all subjects. They must also receive credits for applied training. The internship programme must be agreed with its coordinator. Instead of working on an engineering thesis, students participate in a complex team project. To qualify as an engineer, students must pass the diploma examination.

SEMESTER 1
» Mathematical Analysis I
» Linear Algebra and Analytic Geometry
» Logic for IT Specialists
» Structural and Object-oriented Programming
» Computer System Organisation
» Physics 1A

SEMESTER 2
» Mathematical Analysis 2
» Discrete Mathematics
» Operating Systems
» Data Structures and Algorithms
» Computer Architecture
» Physics 2B
» Basic Physics Laboratory

SEMESTER 3
» Theory of Probabilistic and Statistics
» Programming Paradigms
» Effective Programming Techniques
» Computer Networks
» Basics of Entrepreneurship
» Foreign Language
» Sport Activities

SEMESTER 4
» Basics of Software Engineering
» Databases
» Script Languages
» Systems Analysis and Decision Support
» Foreign Language
» Sport Activities
Elective module:*
M1. Administration of Computer Systems
» Linux Server Administration
» Managing IT Infrastructure
» Routing and Switching in Computer Networks

SEMESTER 5
» Software Engineering
» Introduction to IoT
» Cybersecurity
» Presentation Techniques

Elective module:*
M2. Web Technologies
» Web Systems Programming
» Developing Web Applications with .NET
M3. Database Design
» Database Programming
» Database Design
M4. Mobile Applications
» Mobile Applications for iOS Platform
» Mobile Applications for Android Platform

SEMESTER 6
» Artificial Intelligence
» Business Data Modelling and Analysis
» Internship
Elective module:*
M5. Project Management Basics
» Introduction to IT Project Management
» Support for IT Project Management
M6. Distributed Systems
» Distributed Computer Systems
» Cloud Programming
M7. Programming Tools and Technologies
» Game Programming
» Advanced Web Technologies
M8. Multimedia
» Computer Graphics
» Programming Multimedia Applications
» Digital Media Processing Technologies

SEMESTER 7
» IT Social and Professional Problems
» Team Project
Elective module:*
M9. Current Trends in Computer Science
» Data Science
» Neural Networks
» Metaheuristics in Problems Solving
» Human-Computer Interaction

* a student chooses one subject from the modules

DESCRIPTION

Undergraduate studies in the field of management (Organizational Management) allow for a broad understanding of the principles of the functioning of business organisations. They provide specialist knowledge necessary to operate in many areas of the economy. Graduates will develop their theoretical and practical knowledge in the field of management sciences and related sciences, concerning issues, principles and problems related to the functioning of the organisation, both at the national and international level. They will be ready to take on key project management roles in both commercial and administrative organisations. They will be able to communicate and negotiate effectively, interpret and use data, and work creatively in teams.

ABOUT STUDIES

- **Duration:** 6 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** October 2026
- **Programme coordinator:** Grzegorz Klimek, PhD

JOB PROSPECTS

The knowledge and skills obtained give the graduates the possibility of getting a job as a management / organisation specialist. The management degree (OM) develops competences useful as a middle-level manager in public and private organisations in many sectors (industry, healthcare, education, services, commerce, central and local authority institutions, etc.). It provides a way to develop your own small enterprises or to continue your education at the Master's level.

ENTRY INFORMATION

Requirements: secondary school certificate, received after the completion of a recognised secondary school (total 12 years of education), being the equivalent of Polish Matriculation certificate.
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

CONTENT

- **forms of teaching:** Lectures, laboratories, tutorials, projects, research

SEMESTER 1
- Civil and Commercial Law
- Essentials of Management
- Information Technology
- Mathematics
- Microeconomics
- Psychology
- Social Philosophy

SEMESTER 2
- Descriptive Statistics
- Essentials of Finance
- Macroeconomics
- Organizational Science
- Sociology
- Work Environment Physics
- Computer Science Module
- Social Competences Module
- Sports

SEMESTER 3
- Mathematical Economics
- Financial Accounting in the Organizational Decision Making Process
- Marketing in the Information Society
- Organizational Behaviour
- Computer Science Module
- Economic Science Module
- Foreign Language I
- Management of Knowledge

SEMESTER 4
- Contemporary Organizational Methods and Techniques
- Corporate Finance
- Logistics
- Marketing Management
- Operations Management
- Legal Science Module
- Computer Science Module
- Foreign Language II

SEMESTER 5
- Diploma Seminar
- Financial Management
- Leading Projects in Modern Organizations
- Marketing Research
- Methods and Tools of Data Analysis
- Modern Human Resource Management
- Total Quality Management
- Computer Science Module
- The Microstructure of the Global Financial Market

SEMESTER 6
- Bachelor's Thesis
- Business Process Management
- Financial Analysis Supported by Computers
- Information Systems in Management
- Introduction to Risk Management
- Sport Activity
- Management Training
- Self-presentation

DESCRIPTION

This programme prepares the graduates for creative engineering work in machine design, machine operation and manufacturing processes. The student will be familiar with fundamental methods, techniques, tools and materials used for solving engineering tasks in the field of Mechanical Engineering. The student acquires a directional spiecialisation by studying mechanics, machines theory, principles of machine design, thermodynamics, computer-aided engineering techniques and manufacturing technologies. The programme gives reliable grounds to take a job in any segment of industry and services where designing, producing or maintaining machines and equipment is essential for a business.

ABOUT STUDIES

- **Duration:** 7 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** October 2026
- **Programme coordinator:**
  Sławomir Susz, PhD

JOB PROSPECTS

The graduate of the Faculty of Mechanical Engineering is a versatile educated engineer, equipped with basic and advanced knowledge as well as industrial practice.

ENTRY INFORMATION

Requirements: secondary school certificate, received after the completion of a recognised secondary school (total 12 years of education), being the equivalent of Polish Matriculation certificate. Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**

CONTENT

SEMESTER 1
» Engineering Graphics: Descriptive Geometry
» Chemistry
» Information Technologies
» Fundamentals of Metrology
» Ergonomics and Safety
» Linear Algebra and Analitic Geometry
» Mathematical Analysis 1
» Basic Physics Laboratory
» Physics 1A

SEMESTER 2
» Engineering Graphics: Engineering Drawing
» Engineering Materials Technology
» Elements of Mathematical Analysis
» Applied Thermodynamics
» Fundamentals of Materials Science
» Mechanics I
» Ecology
» Theory of Machines
» Essential of Management
» Electrical Engineering
» Electronics

SEMESTER 3
» Engineering Graphics 3D
» Electrical Engineering
» Statistics for Engineers
» Fluid Mechanics
» Materials Science
» Mechanics II
» Polymers
» Chipless Processes -Casting
» Fundamentals of Materials Strength
» Basic Programming (MATLAB)
» Ordinary Differential Equations

SEMESTER 4
» Fundamentals of Machine Design I
» Fundamentals of Materials Strength
» Theory of Mechanisms and Manipulators
» Chipless Processes -Plastic Forming
» Chipless Processes -Welding Metallurgy
» Geometric Metrology
» Vehicles Drive Systems
» Strength of Materials
» Industrial Metrology

SEMESTER 5
» Hydraulic, Hydrotronic and Pneumatic Systems
» Finite Elements Method
» Fundamentals of Machine Design II
» Fundamentals of Automatic Control
» Manufacturing Processes - Machining
» Vehicle Engineering
» Trybology
» Computer Aided Machine Design I

SEMESTER 6
» Safety of Machines and Technological Processes
» Manufacturing Systems CNC
» Offroad Vehicles Engineering
» Hydraulic Drive Systems
» Internal Combustion Engines
» Carrying Structures
» Computer Aided Machine Design II

SEMESTER 7
» Fundamentals of Exploitation and Repair
» Management in production
» Production System Organisation
» Thesis, Seminar
» Polymers in Engineering
» Vehicles Loading Modelling
» Legal Aspects of Engineering Activities

DESCRIPTION

Medical informatics is a field at the intersection of technology and medicine. This programme aims to train IT specialists who can navigate both worlds: with foundations in computer science and electronics, and a solid understanding of the language of medicine, ready to build the digital infrastructure that modern healthcare demands. A graduate will be an IT specialist with broad domain knowledge in healthcare. They can design, build, and maintain the complex information systems that hospitals, research institutions, and medtech companies rely on. They understand the realities, regulatory constraints, and ethical considerations of clinical settings. They are an engineer, analyst, and health informatics specialist all in one.

ABOUT STUDIES

- **Duration:** 7 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** October 2026
- **Programme coordinators:**
  Prof. dr hab. inż. Małgorzata Kotulska,
  Department of Biomedical Engineering

JOB PROSPECTS

Graduates can work for:
- Clinical informatics teams
- Telehealth service providers
- Medical device, health-tech, and med-tech companies
- Pharmaceutical companies and CROs
- Data analytics and AI companies
- University research centres and bioinformatics institutes
- Biobanks, medical registries, and clinical trial units

ENTRY INFORMATION

Requirements: secondary school certificate, received after the completion of a recognised secondary school (total 12 years of education), being the equivalent of Polish Matriculation certificate. Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**

OBLIGATORY COURSES

COMPUTER SCIENCE COURSES
- Databases
- Introduction to Object-Oriented Programming
- Introduction to Programming
- Mobile Application Development
- Modelling of Biological Systems
- Network Technologies
- Numerical Methods
- Programming in Python
- Software Engineering

GENERAL COURSES
- Academic Writing
- Algebra and Analytic Geometry
- Anatomy for Biomedical Engineers
- Introduction to Biomedical Optics and Biophotonics
- Biochemistry
- Biophysics
- Mathematical Analysis
- Medical Imaging Techniques
- Legal and Ethical Aspects in Biomedical Engineering
- Physics
- Principles of Chemistry
- Principles of Organic Chemistry
- Propaedeutics of Medical Sciences
- Statistics and Probability Theory

ENGINEERING COURSES
- Conversion and Analysis of Non-electrical Signals
- Digital Signal Processing
- Electromedical Instrumentation
- Introduction to Medical Electronics
- Measurement systems
- Microcontrollers

ELECTIVE COURSES
- Advanced Imaging Techniques
- Artificial Intelligence
- Complex Systems
- Computer Graphics
- Computer Science in Medicine
- Elements of Nonlinear Dynamics
- Introduction to Bioinformatics
- Statistical Methods in Bioengineering
- Time Series Analysis

DESCRIPTION

Imagine a world where technology surrounds you at every step – from smart devices in your home to advanced robots in industry. The EAC programme is your gateway to this exciting reality! We combine expertise in electronics, programming, machine learning, and robotics, preparing you to work with technologies shaping the future. Discover the secrets of the Internet of Everything and gain skills that open the door to an extraordinary career.

JOB PROSPECTS

Studying at EAC equips you with the knowledge and skills to land a job right after graduation. Our graduates are in high demand, especially in industries focused on designing, producing, and maintaining electronic systems, as well as software development. The need for specialists who can integrate analog and digital systems, including microprocessors, is rapidly growing. You'll gain expertise in: programming, AI algorithm implementation, designing advanced electronic and robotic systems. With the rise of IoT companies and smart home technologies, engineers who blend electronics and computer science knowledge are more valuable than ever. From design to production and beyond – EAC prepares you for every stage of this cutting-edge industry.

ENTRY INFORMATION

Requirements: secondary school certificate, received after the completion of a recognised secondary school (12 years of education in total), being the equivalent of Polish Matriculation certificate.

» Diploma Seminar
» Entrepreneurship
» Copyright
» Elective courses (choice of 2 out of 5: Electrotechnics, Medical Electronics, Electronics for Renewable Energy Sources, Machine Learning, Ultrasonic Technology)

MASTER'S DEGREE PROGRAMMES

DESCRIPTION

The study programme takes into account in a balanced way the practical and theoretical aspects of the architectural profession with an emphasis on the problem of creativity and design independence of graduates. The leading courses in the students' education are design, which is complemented by field studies related to modern construction systems, as well as theoretical (theory of architecture and urban planning, heritage protection, elements of philosophy, aesthetics) and computer-based (various types of modelling: BiM, 3D) ones. All offered courses and design studies are based on the "Research by design" model, and their wide choice allows students to pursue individual creative interests. Students have the opportunity to work with active architects, with specialists in various fields, and they can also participate in scientific programmes, international exchanges, workshops and study trips. After completion of the Master's programme in Architecture and Urban Planning students are awarded the Master's Degree in Architecture. Graduates are equipped with knowledge and skills that enable them to enrol themselves on doctoral and specialised postgraduate programmes.

ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** October 2026

JOB PROSPECTS

In the Architecture and Urban Planning Master's programme, we train specialists who are able to think critically and independently, who are ready to implement innovative architectural solutions and who are professionally flexible with a wide range of possibilities to choose their professional path. Learning outcomes provide preparation of graduates to work in: architectural and town planning offices, public administration units related to architecture and urban planning. Due to the broad, interdisciplinary profile of the education, graduates can also undertake research-related work and continue their studies at the Doctoral School. Moreover, graduates have skills related to IT techniques, which are necessary both in the work of a designer and a manager planning the investment process. They are able to work in a team, they are aware of the social role of the architectural profession and the humanistic aspects of engineering activity.

ENTRY INFORMATION

Requirements: Architect Engineer. Portfolio. Minimum 210 ECTS for graduates who completed their studies before 2023;
240 ECTS for those who graduated in 2023 or later. Each application is assessed individually on its merits.
If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

CONTENT

SEMESTER 1
» Computer Aided Design BIM I
» Structures in Contemporary Architecture 1
» An Introduction to Mathematical Modelling

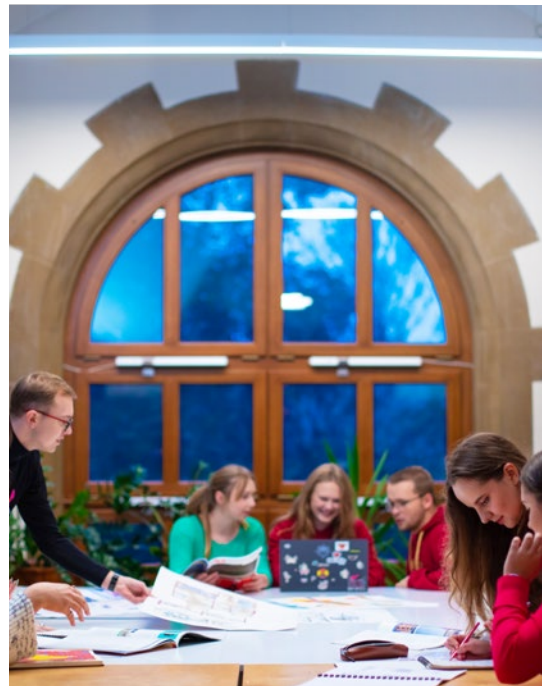
SEMESTER 2
» Professional Ethics and Law in the Investment Process
» Ergonomics
» Sociology and Environmental Psychology
» Physics (Acoustics)
» Modern Technologies

SEMESTER 3
» Diploma Thesis
» Diploma Thesis - Lecture
» Diploma Thesis - Workshops
» Spatial Planning

GROUPS OF ELECTIVE COURSES

SEMESTER 1
» Urban Design
» Architectural Design 1
» Protection of Cultural Heritage
» Theory of Contemporary Architecture
» Foreign Language 2.1
» Conservation Design and Special Design as a Result of Local Conditions

SEMESTER 2
» Design Workshop – Integration of Design Processes
» Methodology of Scientific Work
» Architectural Design 3
» Architectural Design 2
» Humanities
» Foreign Language 2.2
» Ecology



DESCRIPTION

The students gain theoretical knowledge and practical skills connected with structure design, construction materials and technologies as well as static and dynamic analysis of reinforced concrete, prestressed concrete, metal, wooden, ground and complex constructions. They learn how to use advanced computational models and modern IT solutions in civil engineering. In addition to participating in lectures, presentations, labs, seminars and projects the students may also take part in the student scientific groups and international exchanges. A number of courses can be selected by the students depending on their interests and professional plans. At the end of the MSc study students write master's thesis on a subject related to designing of engineering structures. The MSc diploma offers an opportunity to continue education at PhD studies.

ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:**
  October 2026 and February 2027
- **Programme coordinator:**
  Prof. Jan Bień, PhD, DSc

JOB PROSPECTS

The graduates are prepared for:

» solving complex design, organisation or technological problems,
» authorisation to independent design and construction in civil engineering,
» developing and implementing research programmes,
» carrying out jobs in international enterprises,
» participation in marketing and promotion of construction products,
» continuing education, participation in research in the fields directly related to construction and construction production,
» continuous education, improving qualifications and extending knowledge,
» team work and large team management.

The graduates are prepared to work in design offices and construction enterprises, scientific institutions and R&D centres, institutions involved in building infrastructure management or dealing with counselling or dissemination of construction-related knowledge.

ENTRY INFORMATION

Requirements: Bachelor's or Master's Degree in Civil Engineering, Environmental Engineering, Architecture, Hydrotechnical Engineering obtained either in Poland or abroad.
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96, +48 71 320 38 96

CONTENT

The main study of Civil Engineering consists of obligatory and elective courses, covered as lectures, projects and seminars. In addition, some elective units are offered covering also language courses.

SEMESTER 1

» Advanced Computer Aided Engineering
» Concrete Structures - Objects
» Metal Structures - Objects
» Selected Topics in Structural Mechanics
» Theory of Elasticity and Plasticity
» Physics of Modern Materials
» Selected Topics in Mathematics
» Selected Topics in Geoengineering – Foundation
» Hydraulics in Civil Engineering
» Ethics in Engineering/Ethics in Business
» Foreign Language 1
» BIM in Civil Engineering

SEMESTER 2

» Dynamics
» Underground Structures – Urban Infrastructure
» Railways
» Roads, Streets and Airports
» Bridges
» Construction Techniques and Processes
» Apartment Building
» Computational Mechanics
» Foreign Language 2

SEMESTER 3

» Master's Thesis Seminar
» Master's Thesis
» Construction Project Management
- 2 elective courses (one from each group)

ELECTIVE COURSES 1

» Artificial Intelligence in Civil Engineering
» Modern Testing Methods for Non-destructive Inspection of Building Structures
» Advanced Building Physics
» Hydrology for Building Engineers
» Effective Properties of Composites – Introduction to Micro-mechanics

ELECTIVE COURSES 2

» Pre-stressed Concrete Structures
» Timber Structures
» Conservation and Strengthening of Monumental Heritage Structures
» Methods of Applied Statistics (Geostatistics)
» Sustainable Building

DESCRIPTION

Advanced Nano and Biomaterials MONABIPHOT is a Master's course which offers an original qualification in the highly innovative domain of nanomaterials and molecular photonics for materials science and biology. Skills will be acquired at the strongly interdisciplinary level needed to master emerging technologies and to develop original concepts and applications, aiming at novel technological breakthroughs in this domain. We offer courses concerning synthesis and characterization of new materials on the molecular and nanoscale with the special impact on biology. The introduction of the course's subjects help the student to acquire competences as future experts in material science, with special impact on nanomaterials. The language of the Advanced Nano and Biomaterials MONABIPHOT Master's is English. Applicants must have a Bachelor's degree in Chemistry, Physics or Materials Science or related subjects, with a good background in mathematics and chemistry. The graduates could continue the career in research in nano- and/or bio-materials, as Ph.D. students or R&D associates in industrial laboratories in the rapidly emerging nanotechnology industry.
The programme is aimed at students already awarded or expecting a BSc (or a higher degree) or equivalent before the starting date of the term (September 2026 for the current applications).

ABOUT STUDIES

- **Duration:** 3 or 4 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:**
  October 2026 - 4 semesters for candidates without engineering degree
- February 2027 - 3 semesters
- **Programme coordinator:**
  Katarzyna Matczyszyn, PhD, DSc, Prof. at Wrocław Tech

JOB PROSPECTS

The graduate has extended knowledge of chemistry, materials science, natural sciences and technical skills: conduct advanced research experiments with the nanomaterials with the emphasis on biology, propose and optimize new solutions and independently analyze problems related to materials science. The graduates are prepared for creative work in the design and operation of new materials. The graduate is prepared to run the own business.

ENTRY INFORMATION

Requirements: Bachelor's or Bachelor of Engineering Degree in Materials Science, Chemistry or related domains.
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

CONTENT

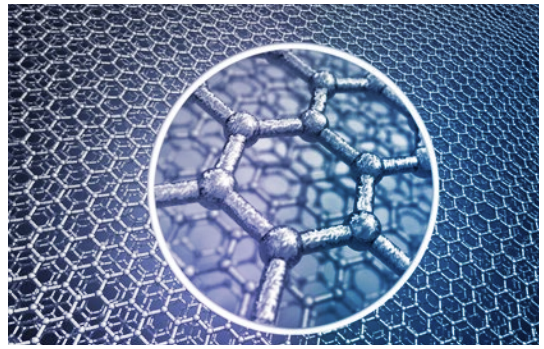
The main study of Advanced Nano- and Bio-materials MONABIPHOT consists of at least 23 units, covered as lectures, labs and seminars. In addition, some optional units are offered covering also language courses.

SEMESTER 0

- Informatics for Engineers
- Biotechnology with introduction to industrial microbiology
- Basics of Technical Drawing
- Technical Safety in Industry
- Material Recovery and Recycling
- Fundamentals of Chemical and Process Engineering
- Bioreactors
- Introduction to Materials Science and Engineering
- Fundamentals of Chemical Technology Design
- Separation and Purification of Products

SEMESTER 1

- Liquid Crystals for Photonics
- Modern Polymers
- Modern Spectroscopy
- Bioorganic Chemistry
- Fluorescence Spectroscopy and Bioimaging
- Biophotonics
- Mathematical Methods in Planning and Analysis of Experiment
- Graduation proseminar
- Managerial course
- Foreign Language I
- Foreign Language II



SEMESTER 2

- Laser and Microscopic Techniques in Materials Analysis
- Nonlinear Optics for Chemists
- Nanoscale Physics
- Advanced Functional Materials
- Nanomaterials
- Organic Electronics
- Advanced Research Methods in the Engineering of Materials
- Optional course
- Graduate Laboratory I

SEMESTER 3

- Advanced Functional Materials
- Optional course
- Graduate Laboratory II
- Graduation Seminar

OPTIONAL COURSES

- Biomaterials
- Nonlinear Optics for Chemists
- Metallic Materials
- Basics Molecular Dynamics

FACULTY OF CHEMISTRY
FIELD OF STUDY: | BIOSCIENCES |
| SPECIALISATION: BIOINFORMATICS |
MASTER'S DEGREE PROGRAMME

DESCRIPTION

Field of study:
BIOSCIENCES
The BioSciences major offers a rigorous exposure to the modern experimental and computational disciplines within Bioinformatics and Medicinal Chemistry fields. The curriculum includes upper-level coursework in chemistry, physics, applied informatics, or bioinformatics allowing students to deepen their understanding of the intricate world of (nano) bio-oriented chemistry. Students have the opportunity to experience cutting-edge modern research within the faculty. Our curriculum is designed to provide students with a broad and well-rounded education that will enable them to pursue a career in academia and pharmaceutical or IT industry.

Specialisation:
Bioinformatics
Bioinformatics constitutes an interdisciplinary research area, covering applications of computer science, chemistry and biochemistry to solve biological problems, usually at the molecular level.
Typical activities include analysis of information contained in literature, genetic and structural databases, prediction of protein structure, drug and biocatalyst or biosensor design. The curriculum introduces programming skills necessary for automation of database searches and analysis of numerical and bioinformatics data, including analysis of new genome sequencing (NGS) results. The study programme includes advanced computer programming as well as specialized molecular biology techniques which are highly valued on present job market.

ABOUT STUDIES

- **Duration:** 3 or 4 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** October 2026 - 4 semesters for candidates without engineering degree
  February 2027 - 3 semesters
- **Programme coordinators:**
  Prof. Tadeusz Andruniów, PhD, DSc

JOB PROSPECTS

The combination of computational skills and basic knowledge of biotechnology aims to prepare the graduates for work in research and development sectors, manufacturing chemical software or databases, developing modern bioinformatics diagnostic services in medical laboratories, conducting quality control in environment protection pharmaceutical or food industry laboratories. Our graduates typically continue level III (Ph.D.) education in renowned academic institutions or are employed by national and international companies.

ENTRY INFORMATION

Requirements: Bachelor's or Bachelor of Engineering Degree in Chemistry or related domains (3-semester programme). Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

SPECIALISATION: BIOINFORMATICS

The curriculum is composed of at least 25 units, covered as lectures, labs or seminars.

SEMESTER 0
- Informatics for Engineers
- Biotechnology with Introduction to Industrial Microbiology
- Basics of Technical Drawing
- Technical Safety in Industry
- Material Recovery and Recycling
- Fundamentals of Chemical and Process Engineering
- Bioreactors
- Introduction to Materials Science and Engineering
- Fundamentals of Chemical Technology Design
- Separation and Purification of Products

SEMESTER 1
- Bioinformatics
- Molecular Dynamics
- Networks and Workstations with UNIX System
- Applied Informatics
- Theoretical Chemistry
- Graduation Proseminar
- Managerial Course I
- Foreign Language I
- Elective course

SEMESTER 2
- Molecular Modeling
- Bionanotechnology
- Rational Drug Design
- Advanced Bioinformatics
- Advanced Programming and Numerical Methods
- Data Mining
- Retrieval of Scientific and Technical Information
- Managerial Course II
- Graduate Laboratory I
- Foreign Language II

SEMESTER 3
- Machine Learning for Chemistry and Biology
- Computational Genomics
- Molecular Engineering in Genomic Analyses
- Graduate Laboratory II
- Graduation Seminar

ELECTIVE COURSES
- Medicinal and Biological Chemistry
- Methodology of Experimental Research
- Bioprocess Project
- Advanced Polymers for Chemical and Medical Applications

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

DESCRIPTION

Field of study:
BIOSCIENCES
The BioSciences major offers a rigorous exposure to the modern experimental and computational disciplines within Bioinformatics and Medicinal Chemistry fields. The curriculum includes upper-level coursework in chemistry, physics, applied informatics, or bioinformatics allowing students to deepen their understanding of the intricate world of (nano)bio-oriented chemistry. Students have the opportunity to experience cutting-edge modern research within the faculty. Our curriculum is designed to provide students with a broad and well-rounded education that will enable them to pursue a career in academia and pharmaceutical or IT industry.

Specialisation:
Medicinal Chemistry
Medicinal chemistry is a scientific discipline at the intersection of chemistry and computational science, connected with designing, synthesizing and developing new pharmaceuticals. At the beginning, medicinal chemistry was involved in screening of natural sources like plants or animals for bioactive compounds. Now, natural products serve as the lead structures in the synthesis and development of new chemical entities dedicated for therapeutic use. Medicinal chemistry includes preparation and analysis of existing and new potential drugs, evaluation of their biological properties, analysis of structure-activity relationships. It is a highly interdisciplinary discipline widely using advanced, synthetic, spectroscopic, computational methods and machine learning. Thus, medicinal chemists cooperate with theoretical chemists, synthetic chemists, medical doctors, microbiologists and pharmacologists.
The graduation document certifies the degree in chemistry with the notification of a deepened specialization in Medicinal Chemistry. The study for applicants without engineering degree lasts 2 years, otherwise 1.5 years only.

ABOUT STUDIES

- **Duration:** 3 or 4 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** October 2026 - 4 semesters for candidates without engineering degree
  February 2027 - 3 semesters
- **Programme coordinators:**
  Prof. Rafał Latajka, PhD, DSc

JOB PROSPECTS

The students are educated in the field of chemistry, mainly synthesis, structure analysis including spectroscopic methods, molecular modeling, machine learning and they have training in medicinal chemistry. Some students, depending on their Master thesis topic, may accomplish part of their research and/or graduate laboratory at Medical University, under supervision of medical doctors or in the Institute of Immunology and Experimental Therapy in Wrocław. Master's Degree programmes provide many skills and abilities demanded in scientific laboratories as well as in modern chemical and pharmaceutical industry, especially in R&D units.

ENTRY INFORMATION

Requirements: Bachelor's or Bachelor of Engineering Degree in Chemistry or related domains (3-semester programme). Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

SPECIALISATION: MEDICINAL CHEMISTRY

The main study of Medicinal Chemistry consists of at least 22 units, covered as lectures, labs and seminars. In addition some optional units are offered covering also language courses.

SEMESTER 0
» Informatics for Engineers
» Biotechnology with Introduction to Industrial Microbiology
» Basics of Technical Drawing
» Technical Safety in Industry
» Material Recovery and Recycling
» Fundamentals of Chemical and Process Engineering
» Bioreactors
» Introduction to Materials Science and Engineering
» Fundamentals of Chemical Technology Design
» Separation and Purification of Products

SEMESTER 1
» Theoretical Chemistry
» Spectroscopic Methods in Medicinal Chemistry
» Crystallography and Structure of Solids
» Analytical Methods in Drug Design and Technology
» Introductory Statistics
» Isolation and Identification of Bioproducts
» Metabolomics
» Managerial Course I
» Foreign Language I

» Graduation Proseminar
» Elective course

SEMESTER 2
» Metabolomics
» Molecular Modeling
» Retrieval of Scientific and Technical Information
» Medicinal Natural Products
» Modern Pharmaceuticals and Biopharmaceuticals
» Rational Drug Design
» Managerial Course II
» Foreign Language II
» Graduate Laboratory I

SEMESTER 3
» Multistep Organic Synthesis
» Inorganic Drugs
» Machine Learning for Chemistry and Biology
» Graduate Laboratory II
» Graduation Seminar

ELECTIVE COURSES
» Medicinal and Biological Chemistry
» Methodology of Experimental Research
» Bioprocess Project
» Advanced Polymers for Chemical and Medical Applications

DESCRIPTION

Field of study:
CHEMICAL ENGINEERING AND TECHNOLOGY
The Master of Chemical Engineering and Technology Programme aims to provide students with advanced knowledge, practical skills, and innovative thinking in the field of chemical engineering and technology to solve complex industrial challenges. The programme will focus on cutting-edge technologies, emphasizing the practical application of engineering principles in solving the problems of modern society. Graduates will be well-prepared to take on leadership positions in the industry or pursue further studies at the PhD level.

Specialisation:
Advanced Chemical Technology
Advanced Chemical Technology aims to provide students with advanced knowledge and practical skills in the field of chemical technology. The programme emphasizes the practical application of technology principles to address complex industrial and societal problems, preparing graduates for careers in the industry as well as engaging them with the latest research in the field.
The programme will consist of core and elective courses in the following areas:
- Advanced chemical process design and optimization
- Chemical reaction engineering
- Separation processes
- Bioprocess engineering
- Surface chemistry
- Materials science and engineering
- Product design and development
- Environmental engineering and sustainability
- Industrial plant design, modelling and simulation.

In addition to coursework, students will undertake a research team project and graduate thesis in a specialized area of chemical technology. The research project and thesis requirement will allow students to gain hands-on expertise in applying theoretical and practical methodologies to real-world challenges in the field.

ABOUT STUDIES

- **Duration:** 3 or 4 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** October 2026 - 4 semesters for candidates without engineering degree
  February 2027 - 3 semesters
- **Programme coordinator:**
  Piotr Rutkowski, PhD DSc, Prof. at Wrocław Tech

JOB PROSPECTS

Graduates of the programme will be equipped with advanced knowledge, practical skills, and innovation thinking in chemical technology, and be well-prepared for careers in industrial manufacturing,research and development, and technology consulting firms. Potential career paths include chemical technologist, product development engineer, process engineer, environmental engineer, research scientist, and quality assurance specialist. Graduates will be able to work within diverse industries, including pharmaceuticals, biorefineries, chemicals, energy and fuels, and materials science.

ENTRY INFORMATION

Requirements: Bachelor's or Bachelor of Engineering Degree in Chemical Engineering or related domains (3-semester programme). Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**

admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: ADVANCED CHEMICAL TECHNOLOGY

The main study of Advanced Chemical Technology consists of at least 23 units, covered as lectures, labs and seminars. In addition, some optional units are offered covering also language courses.

SEMESTER 0
» Informatics for Engineers
» Biotechnology with Introduction to Industrial Microbiology
» Basics of Technical Drawing
» Technical Safety in Industry
» Material Recovery and Recycling
» Fundamentals of Chemical and Process Engineering
» Bioreactors
» Introduction to Materials Science and Engineering
» Fundamentals of Chemical Technology Design
» Separation and Purification of Products

SEMESTER 1
» Advanced Chemical Technologies – Biorefinery Technologies for Chemicals and Fuels
» Industrial Plants Design Principles
» Environmental Protection in Chemical Industry
» Trends in Chemical Engineering and Technology
» Surface Phenomena and Heterogenous Catalysis
» Retrieval of Scientific and Technological Resources
» Mathematics for Engineers
» Managerial Course I

» Managerial Course II
» Foreign Language I
» Graduation Proseminar

SEMESTER 2
» Advanced Chemical Technologies – Modern Macromolecular Engineering Materials
» Chemical Sensors and Biosensors – Fundamentals and Applications
» Chemical Reactors and Bioreactors
» Green Chemistry and Sustainable Technology
» Scientific Team Project
» Foreign Language II
» Graduate Laboratory I

SEMESTER 3
» Advanced Chemical Technologies – Nanotechnologies and Energy
» Elective course
» Graduate Laboratory II
» Graduation Seminar

CONCLUSION

The Master of Advanced Chemical Technology Programme will provide students with advanced knowledge, practical skills, and innovation thinking in the field of chemical technology. The program's curriculum and research requirements have been tailored to equip graduates with a thorough grounding in theoretical and practical aspects of chemical technology, preparing them for leadership roles in the industry or advanced study in the field. Graduates would be well-positioned with skills and knowledge for problem-solving and adapting to evolving global trends in science,technology and business to meet the growing challenges of the industry.

DESCRIPTION

Field of study:
CHEMICAL ENGINEERING AND TECHNOLOGY
The Master of Chemical Engineering and Technology Programme aims to provide students with advanced knowledge, practical skills, and innovative thinking in the field of chemical engineering and technology to solve complex industrial challenges. The programme will focus on cutting-edge technologies, emphasizing the practical application of engineering principles in solving the problems of modern society. Graduates will be well-prepared to take on leadership positions in the industry or pursue further studies at the PhD level.

Specialisation:
Advanced Chemical Engineering
The programme of studies directly reflects the current needs of the labour market in the field of Chemical and Process Engineering, providing employment opportunities. It is designed to provide the graduates with the following learning outcomes: knowledge on developments and new developments in the field of chemical engineering, ability to use new advances in the field of chemical engineering, basic understanding of the processes of governance, knowledge of the functions, principles and management instruments, including quality management and identification of the main problems of management, knowledge of the design of process devices and systems, integration and process intensification, performing a complete process design, the use of computer technology, including tools for exploring and simulating the dynamics of various processes. Advanced Chemical Engineering combines classical chemical engineering with bioprocess engineering, nanoengineering, chemical technology and environmental engineering. The graduation document certifies the degree in engineering chemistry with the notification of a deepened specialization in Advanced Chemical Engineering. Study for applicants without engineering degree study lasts 2 years, otherwise 1.5 years only.

ABOUT STUDIES

SPECIALISATION: ADVANCED CHEMICAL ENGINEERING

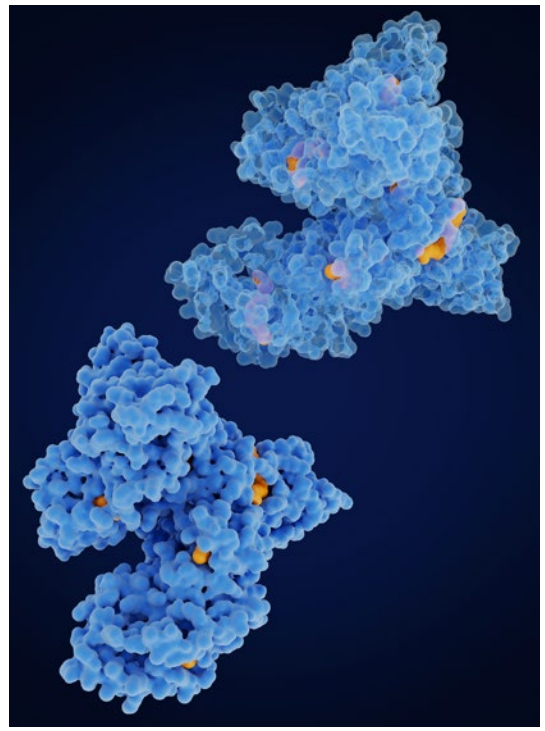
The main study of Advanced Chemical Engineering consists of at least 23 units, covered as lectures, labs and seminars. In addition, some optional units are offered covering also language courses.

SEMESTER 0
- Informatics for Engineers
- Biotechnology with Introduction to Industrial Microbiology
- Basics of Technical Drawing
- Technical Safety in Industry
- Material Recovery and Recycling
- Fundamentals of Chemical and Process Engineering
- Bioreactors
- Introduction to Materials Science and Engineering
- Fundamentals of Chemical Technology Design
- Separation and Purification of Products

SEMESTER 1
- Trends in Chemical Engineering and Technology
- Membrane Processes
- Chemical Processes Equipment
- Heterogeneous Reactors
- Retrieval of Scientific and Technological Resources
- Mathematics for Engineers
- Managerial Course I
- Managerial Course II
- Foreign Language I
- Graduation Proseminar

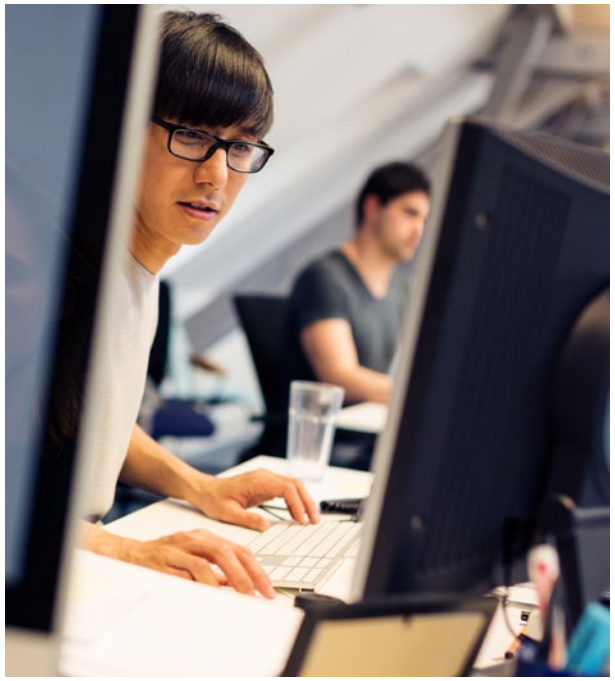
SEMESTER 2
- Chemical Processes Project with CFD Calculations
- Biocatalysis in Food, Brewery and Pharmaceutical Industry
- Numerical Applications in Nanoengineering
- Nanotechnology
- Green Chemistry and Sustainable Technology
- Foreign Language II
- Graduate Laboratory I

SEMESTER 3
- Chemical Process Optimization and Management
- Elective course
- Graduate Laboratory II
- Graduation Seminar



DESCRIPTION

The Computer Engineering specialization in Applied Computer Science prepares students for professional work by providing them with in-depth specialist knowledge and advanced engineering skills in the following areas: IT system design, computer game design, IT project management, user experience, advanced databases, advanced cybersecurity issues, knowledge engineering, and advanced artificial intelligence issues. Subjects such as Experiment planning and analysis, and Research methodology prepare students for scientific and research work. The specialist education is complemented by modules in Ethics, Entrepreneurship and Intellectual property. Throughout their studies, students develop soft skills such as teamwork, creativity, problem solving, and presenting their work and ideas. The programme concludes with a Master's thesis, preceded by a Monographic project. The purpose of this is to introduce students to the methodology of writing a Master's thesis and guide them through the initial stage.



ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** February 2027
- **Programme coordinator:** Elżbieta Kukla, PhD

JOB PROSPECTS

Employment in IT companies and organisations which apply informatics tools and systems at the specialists and manager positions.

ENTRY INFORMATION

Requirements: Bachelor's Degree, preferably in Computer Science or in a related field. Applicants with a Bachelor's Degree outside of Computer Science must demonstrate significant proficiency in computer science. Any area of requirements can be satisfied through courses completed at the bachelor level or by relevant experience.
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, 71 320 38 96

SPECIALISATION: COMPUTER ENGINEERING

Students are required to complete 1095 hours of coursework (equivalent to 90 ECTS credits). The programme consists of lectures and practical activities, including laboratories, seminars and projects. Students must receive credits for all subjects.
Modern teaching models, methods and techniques are employed throughout the teaching process. These help to foster students' need for self-education and continuous upskilling, and develop their ability to adapt to changes in the professional environment that require reskilling.
To qualify for a Master's degree, students must prepare and defend an original thesis and pass a final examination.

SEMESTER 1

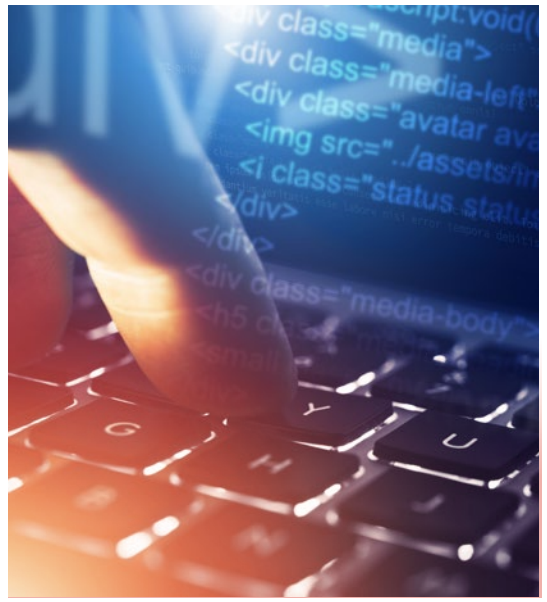
» Advanced Topics in Cybersecurity
» Advanced Databases
» Analysis of Web-based System
» Foundations of Knowledge Engineering
» Software System Development
» Methods for experiment design and analysis
» Physical foundations of modern computing
» Foreign language

SEMESTER 2

» Advanced Topics in Artificial Intelligence
» Project Management
» Recent Advances in Computer Science
» Research Methodology
» User Experience
» Monographic project
» Business fundamentals and intellectual property protection

SEMESTER 3

» Mobile and Multimedia Systems
» Video Game Design
» Diploma seminar
» Master Thesis
» Ethics of New Technologies



DESCRIPTION

The ACS studies' programme is focused on delivering multidisciplinary knowledge and developing theoretical and practical skills in modern areas of computer science (Machine Learning, Neural Networks, optimisation, etc.), information technology and computer systems. We believe that students gain the most when they are involved in research (working on projects) individually and as a team while the lecturer is ready to advise and guide. Therefore, more than 65% of the course's programme is focused on active forms of learning like group projects, seminars, classes (tutorials) and laboratory training. ACS (formerly known as AIC - Advanced Informatics and Control) shapes many successful PhD candidates and researchers. Historically speaking, we have had 25 double diploma students and 11 PhDs with the cooperation of foreign universities.

JOB PROSPECTS

The graduates will gain deep knowledge in computer science (Machine Learning, algorithms, optimisation) and software engineering. They will be prepared to solve real-life IT and computer science problems, conduct proper research and learn how to gain information from the literature and other available sources. The alumnus will be prepared for a role of a team leader and have extensive teamwork skills (critical thinking, collaboration, communication etc.). They will have experience in both organising and participating in workshops/conferences. They will acquire the experience necessary for a professional career at research units, universities, colleges, and industry. In addition, they will develop English communication skills that are well above industry standards.

ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** February 2027
- **Programme coordinator:** Wojciech Kmiecik, PhD

ENTRY INFORMATION

Requirements: Bachelor's Degree in Informatics, Computer Science, Computer Engineering, Information Technology, Teleinformatics, Computer Systems, Robotics, Control, Control Engineering, Systems, Electronics, Telecommunications. Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, 71 320 38 96

SPECIALISATION: ADVANCED COMPUTER SCIENCE

SEMESTER 1

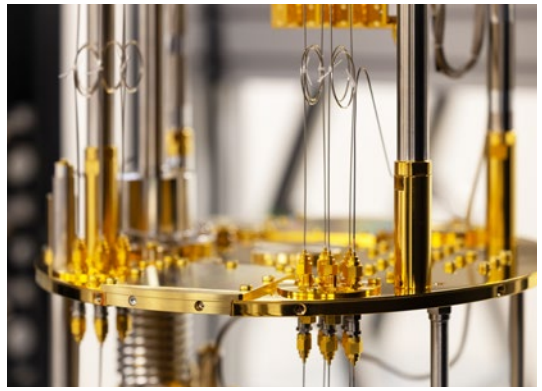
» Research Skills and Methodologies
» Optimisation Methods: Theory and Applications
» IT Applications in Business and Commerce
» Information Systems Modelling
» Computer Project Management
» Discrete Mathematics
» Social Communications
» Foreign Language/Polish Language I
» Physics

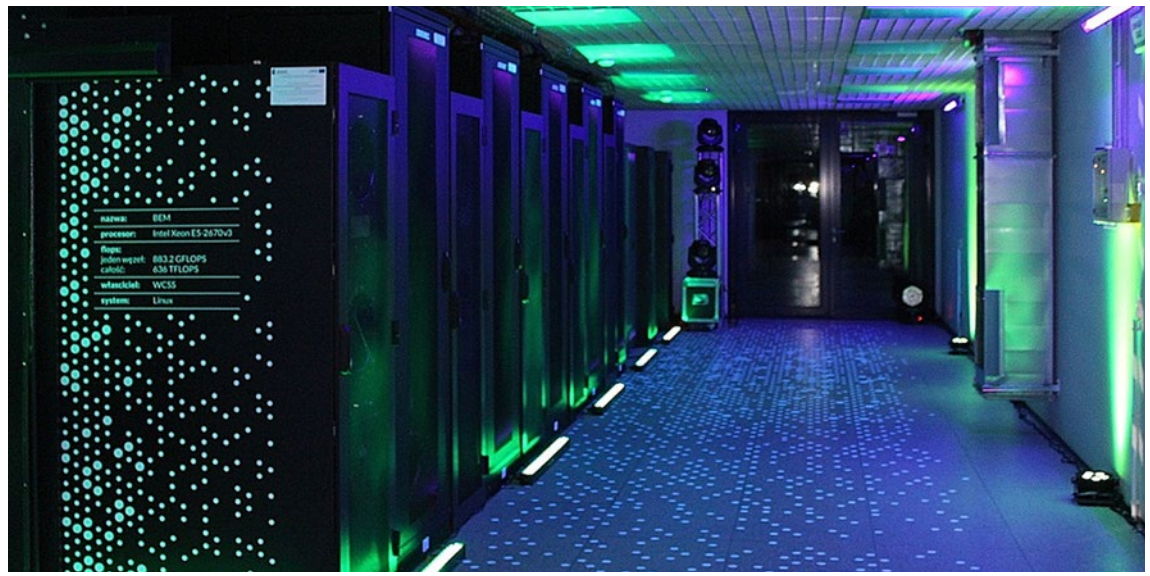
SEMESTER 2

» Machine Learning
» Neural Networks
» Research Project 1
» Secure Systems and Networks
» Modelling and Optimisation of Computer Networks
» Information and Storage Management
» ACS Seminar
» Foreign Language/Polish Language II
» Master Thesis 1

SEMESTER 3

» Research Project 2
» Natural Language Processing
» Introduction to Computer Vision in Quality Control
» Entrepreneurship
» Diploma Seminar
» Master Thesis 2





DESCRIPTION

The programme is focused on delivering knowledge and developing skills needed for a successful career in Computer Science and Engineering, particularly in designing and maintaining complex service-oriented information systems. It develops abilities to solve non-routine problems and to formulate opinions based on incomplete information. The programme covers professional topics as well as R&D teamwork. Special attention is given to the ability to work in multinational industrial teams. The curriculum covers software development and analysis, networking, web services, human interfaces, and security of complex information systems.

ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** February 2027
- **Programme coordinator:**
  Prof. Czesław Smutnicki, PhD, DSc, Eng

JOB PROSPECTS

The graduates will have knowledge and skills needed for a career in computer and software organisations, research units, industry, government administration, and education. They will be particularly well prepared to work on the implementation and maintenance of new-generation web services. They will have the experience necessary for a professional career and undertake level III (Ph.D.) education. In addition, they will possess well above standard skills in communication in multinational teams.

ENTRY INFORMATION

Requirements: Bachelor's Degree in Computer Science, Computer Engineering, Information Technology, Informatics, Teleinformatics, Telecommunication or related. The degree must be obtained in an engineering programme of studies of at least 3.5 years duration (equivalent to 210 ECTS).

Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail:

admission@pwr.edu.pl

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, 71 320 38 96

SPECIALISATION: INTERNET ENGINEERING

The programme includes traditional lectures and hands-on study forms (mainly laboratories and design projects). In the 3rd semester, the student is also required to complete a final individual project and write a thesis on its basis. The diploma examination, the passing of which is required to obtain the Master's title, covers topics of the completed courses and the thesis presentation. The courses delivered in each semester are as follows:

SEMESTER 1

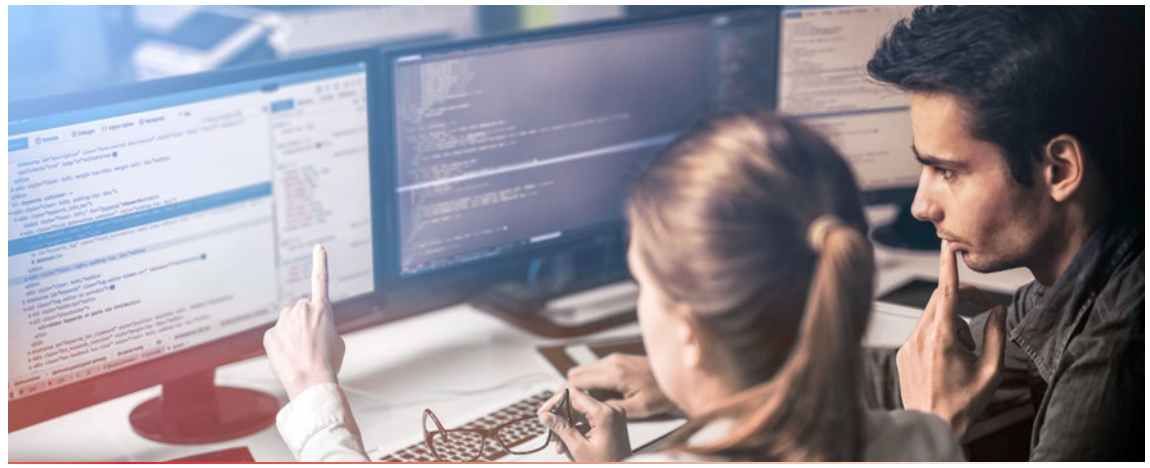
- Research Skills and Methodologies
- Optimisation Methods: Theory and Applications
- IT Applications in Business and Commerce
- Information Systems Modelling
- Computer Project Management
- Discrete Mathematics
- Social Communications
- Foreign Language/Polish Language I
- Physics

SEMESTER 2

- Multimedia and Computer Visualization
- Information Systems Analysis
- Advanced Databases
- Secure Systems and Networks
- Softcomputing
- Foreign Language
- Master Thesis 1
- Natural Language Processing

SEMESTER 3

- Application Programming: Data Mining and Data Warehousing
- Application Programming: Mobile Computing
- Diploma Seminar
- Master Thesis 2
- Entrepreneurship



DESCRIPTION

The students can spend full duration of the studies at Wrocław University of Science and Technology (Wrocław Tech) or benefit from the Double-Degree option. The joint double degree programme is run together with Toronto Metropolitan University (TMU) in Toronto, Canada (possibility of exchange for Polish and Canadian citizens only) and University of Palermo (UNIPA), Italy, RWTH Aachen University, Aachen (Germany), Lappeenranta-Lahti Univeristy of Technology (Finland). The goal of the programme is to improve the quality of graduate-level education and training in the field of control engineering. It is focused on new and challenging issues of power system automation and control. The programme offered by the Faculty of Electrical Engineering is split up into four semesters, including a Master's Thesis semester and a 4-week industrial placement. Students have the opportunity to spend either their first or second year at a partner university, depending on their chosen institution. During their second year, they will undertake the writing of their thesis at the host university.

ABOUT STUDIES

- **Duration:** 4 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:**
  - October 2026 at Wroclaw Tech
  - September 2026 at LUT (Double Degree Programme),
  - September 2026 at TMU (Double Degree Programme)
  - September 2026 at UNIPA (Double Degree Programme)
- **Programme coordinator:** Prof. Robert Lis

JOB PROSPECTS

The programme is devoted to the candidates interested in work related to electric power system control, reliability, transmission and distribution of electrical energy, protection and decision-making in power systems, energy market issues, etc.

ENTRY INFORMATION

Requirements: Bachelor's Degree in Electrical Engineering or related field.
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- Deadline for application for full programme at Wrocław Tech: **www.admission.pwr.edu.pl**
- Deadline for application for double degree programme: **https://weny.pwr.edu.pl/en/candidates/application-deadlines**

- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

SPECIALISATION: CONTROL IN ELECTRICAL POWER ENGINEERING

COURSES AT WROCŁAW TECH:

SEMESTER 1
- Numerical and Optimisation Methods
- Power Quality Assessment
- Power Systems Faults
- Fault Calculations
- Dynamics and Control of AC and DC Drives
- Circuits and Systems
- Advanced Technology in Electrical Power Generation
- Foreign Language – A1 or A2
- Foreign Language – B2+ or C1+

SEMESTER 2
- Digital Control Techniques
- Simulation and Analysis of Power System Transients
- Digital Signal Processing for Protection and Control
- Power System Protection
- Fibre Optics Communications and Sensors
- Renewable Energy Sources
- Electric Power System Operation and Control
- Diploma Placement 4 Weeks
- Elective Course from Management Block

SEMESTER 3
- Advanced High Voltage Technology
- Artificial Intelligence Techniques
- Power System Automation and Security
- Electrical Power Systems Management
- Electromagnetic Compatibility
- Measurement Methods and Techniques
- Diploma Project
- Elective Courses from Law Block

SEMESTER 4
- Diploma Seminar
- Master's Thesis
- Elective course from Social Sciences and Ethics Block
- Elective Course from A Block and B Block

COURSES AT UNIPA:
https://wroclaw.tech/UNIPA-courses

COURSES AT RWTH:
https://wroclaw.tech/RWTH-courses

COURSES AT TMU:
https://wroclaw.tech/RU-courses

COURSES AT LUT:
https://www.lut.fi/en/studies/apply-lut/applying-masters-programmes/regular-admission-masters-studies

DESCRIPTION

The students of the programme can spend full duration of the studies at Wrocław University of Science and Technology (Wrocław Tech) or benefit from the Double-Degree option. The DD option is a proposal for a limited number of the best applicants. Students spend one year in Wrocław and one year at a partner university (depending on the institution, this may be the first or second year). They write their thesis at the university where they spend their second year. They can choose the double degree option with the University of Palermo (UNIPA), Italy, the Otto von Guericke University Magdeburg (OVGU), Germany, or Lappeenranta-Lahti University of Technology (LUT), Finland. In each case, the thesis is written at the institution where they spend their second year. The programme is focused on the modern issues related to renewable energy sources and their integration in power system.

ABOUT STUDIES

- **Duration:** 4 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:**
  - October 2026 at Wrocław Tech or OvGU (Double Degree Programmes)
  - September 2026 at UNIPA (Double Degree Programme)
  - September 2026 at LUT (Double Degree Programme)
- **Programme coordinator:**
  Prof. Robert Lis

JOB PROSPECTS

The programme is devoted to the candidates interested in work related to renewable energy systems, reliability, transmission and distribution of electrical energy, protection and decision-making in power systems, energy market issues, etc.

ENTRY INFORMATION

Requirements: Bachelor's Degree in Electrical Engineering or related field.
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- Deadline for application for full programme at Wrocław Tech: **www.admission.pwr.edu.pl**
- Deadline for application for double degree programme: **https://weny.pwr.edu.pl/en/candidates/application-deadlines**

- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: RENEWABLE ENERGY SYSTEMS

Courses at WROCŁAW TECH:

SEMESTER 1

- Numerical and Optimisation Methods
- Power Quality Assessment
- Power Systems Faults
- Fault Calculations
- Dynamics and Control of AC and DC Drives
- Circuits and Systems
- Advanced Technology in Electrical Power Generation
- Foreign Language – A1 or A2
- Foreign Language – B2+ or C1+

SEMESTER 2

- Power Electronics
- Simulation and Analysis of Power System Transients
- Protection and Control of Distributed Energy Sources 1
- Renewable Energy Sources
- Water Power Plants 1
- Integration of Distributed Resources in Power Systems
- Electromechanical Systems in Renewable Energy
- Modelling of Electrical Machines
- Diploma Placement 4 Weeks
- Elective Course from Management Block
- Energy Storage Systems

SEMESTER 3

- Photovoltaic Cells
- Protection and Control of Distributed Energy Sources 2
- Water Power Plants 2
- Industrial Ecology - Selected Problems
- Artificial Intelligence Techniques
- Legal Regulations and Investments in Power Systems with Distributed Energy Sources
- Electromagnetic Compatibility
- Measurement Methods and Techniques
- Diploma Project
- Elective Courses from Law Block

SEMESTER 4

- Diploma Seminar
- Master's Thesis
- Elective Course from Social Sciences and Ethics Block
- Elective Course from A Block and B Block

Courses at OvGU:

SEMESTER 3

- Power Electronics
- Digital Info Processing
- Electromagnetic Field Theory
- Project
- Power System Analysis
- iDynamics of Distributed Parameter Systems

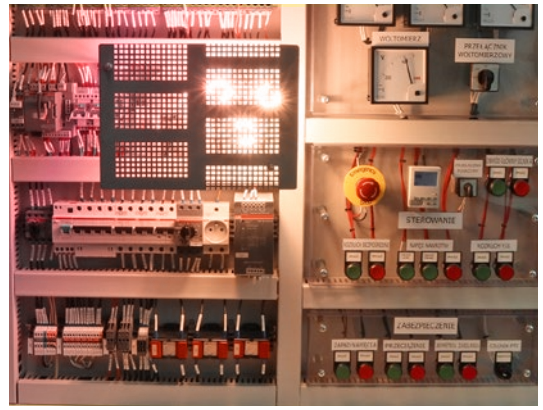
SEMESTER 4

- Master's Thesis

Courses OvGU:
https://www.ovgu.de/unimagdeburg/en/Study/

Courses LUT:
https://www.lut.fi/en/studies/technology/

Courses UNIPA:
https://offertaformativa.unipa.it/offweb/public/



DESCRIPTION

The 4-semester full-time Master's programme in English offers a **double degree** option in cooperation with partner universities. In this track, students spend **two mobility semesters (Semester 2 and Semester 3) abroad** at either the University of Miskolc in Hungary or the **University of Zagreb in Croatia**. The **first and last semesters (Semester 1 and Semester 4)** are completed at **Wrocław University of Science and Technology**, where students ultimately receive their WUST diploma.

The programme is designed to train specialists in **Earth Sciences** with strong foundations in **geology and geophysics**, complemented by skills in **3D modeling, data processing, and interpretation**. Students gain expertise in **innovative mineral exploration technologies**, including tools aligned with **Industry 4.0**. The curriculum also introduces concepts of **sustainable development, corporate social responsibility, social license to operate, and entrepreneurship**.

Graduates of this track are prepared to work in **mining and exploration companies, technical supervision authorities, public administration, research institutions**, and are equipped to **establish their own business** as independent exploration geologists. Students develop social skills, enabling them to operate effectively in **international and multicultural teams**.

ABOUT STUDIES

- **Duration:** 4 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** October 2026 and February 2027
- **Programme coordinator:**
  Gabriela Paszkowska, PhD,
  Prof. at Wrocław Tech

JOB PROSPECTS

Graduates of the programme are prepared to work in industry, technical supervision authorities, governmental and local administration, design offices, and research institutions, both in Poland and abroad. They are also equipped to establish and manage their own businesses, including pursuing a career as independent exploration geologists. In their professional activities, graduates will demonstrate proficiency in English and will be fully prepared to operate effectively in international and multicultural environments.

ENTRY INFORMATION

Requirements: Bachelor's Degree – Bachelor of Science or Bachelor of Engineering (any incl. Geology Engineering, Mining Engineering, Mechanical Engineering, Energy-related Engineering studies etc.). Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: MINERAL RESOURCES EXPLORATION

Knowledge will be provided in the form of lectures, tutorials, laboratories, computer labs, project works and seminars.

SEMESTER 1

Track University of Miskolc – WUST
» Physical Geology
» Mineralogy and Geochemistry
» Geophysical Exploration Methods I
» Numerical Methods and Optimization
» Engineering Physics
» Geodesy, Spatial Informatics
» Computer Science for Engineers
» Data and Information Processing
» Graduate Research Seminar

Track WUST - University of Miskolc/ Track WUST - University of Zagreb
» Operations Research
» Project Management, Appraisal and Risk Evaluation
» Environmental Management
» Digital Mine
» Computer Aided Geological Modelling & Geostatistics
» Engineering Geophysics
» Principles and Application of InSAR and GIS in Mining
» Occupational Health and Safety
» Foreign Languages

Track University of Zagreb - WUST
» Sedimentology
» Mineral Deposits Exploration
» Petroleum Geology
» Engineering Geological Investigations
» Exploration Geochemistry
» Remote Sensing of Mineral Resources
» GIS in Exploration of Mineral Resources

SEMESTER 2

Track University of Miskolc – WUST
» Structural Geology
» Mineral Deposits
» Engineering Geology and Hydrogeology
» Analytical Technics in Mineralogy and Petrology
» Geophysical Measurements
» Geological Mapping
» Historical Geology
» Geophysical Exploration Methods II

Track WUST - University of Miskolc
» Physical Geology
» Mineralogy and Geochemistry
» Geophysical Exploration Methods I
» Geological Interpretation and Prospecting
» Geophysical Interpretation and Prospecting
» Geoelectric Lectureship
» Global Environmental Geophysics
» Non-Metallic Industrial Minerals

Track University of Zagreb - WUST
» Regional Hydrogeology
» Seismotectonic
» Industrial Mineral Deposits and Applications
» Analytical Methods in Ore Deposits
» Geophysical Exploration and Mineral Resources
» Analyses of Mineral Paragenesis
» Field and Laboratory Practicum

Track WUST - University of Zagreb
» Sedimentology
» Mineral Deposits Exploration
» Petroleum Geology
» Engineering Geological Investigations
» Exploration Geochemistry
» Remote Sensing of Mineral Resources
» GIS in Exploration of Mineral Resources

SEMESTER 3

Track University of Miskolc – WUST
» Digital Mine
» Geochemistry
» Free Elective 1
» Design Thinking
» Electronic Sources of Information in Master Thesis Preparation
» Research in Innovative Exploration
» Computer Aided Geological Modelling & Geostatistics
» Engineering Geophysics
» Principles and Application of InSAR and GIS in Mining
» Occupational Health and Safety
» Foreign Languages

Track WUST - University of Miskolc
» Structural Geology
» Mineral Deposits
» Engineering Geology and Hydrogeology
» Analytical Technics in Mineralogy and Petrology
» Geochemical Prospecting Methods
» Geological Mapping
» Graduate Research Seminar
» Student Research Project

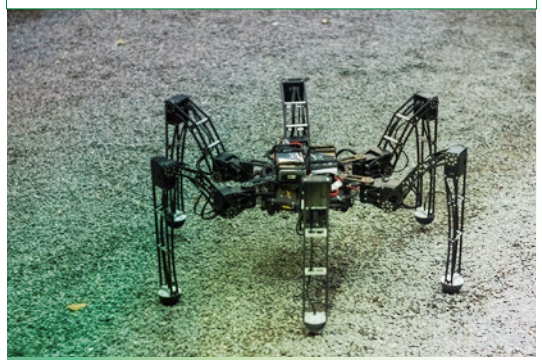
Track University of Zagreb - WUST
» Regional Hydrogeology
» Seismotectonic
» Industrial Mineral Deposits and Applications
» Analytical Methods in Ore Deposits
» Geophysical Exploration and Mineral Resources
» Analyses of Mineral Paragenesis
» Field and Laboratory Practicum

Track University of Zagreb - WUST
» Operations Research
» Project Management, Appraisal and Risk Evaluation
» Environmental Management
» Digital Mine
» Computer Aided Geological Modelling & Geostatistics
» Engineering Geophysics
» Principles and Application of InSAR and GIS in Mining
» Occupational Health and Safety
» Foreign Languages

Track WUST - University of Zagreb
» Regional Hydrogeology
» Seismotectonic
» Industrial Mineral Deposits and Applications
» Analytical Methods in Ore Deposits
» Geophysical Exploration and Mineral Resources
» Analyses of Mineral Paragenesis
» Field and Laboratory Practicum

SEMESTER 4

Track University of Miskolc - WUST
Track WUST - University of Miskolc
Track University of Zagreb – WUST
Track WUST - University of Zagreb
» Exploration Entrepreneurship
» SOC Internship
» Applied Field Exploration
» Master Thesis
» Diploma seminar

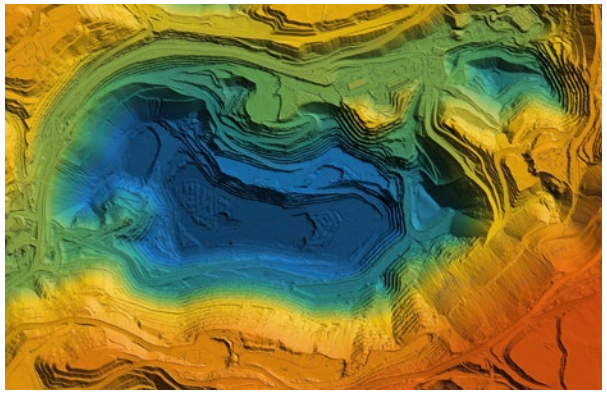


DESCRIPTION

This Double Degree EIT Label MSc programme, offered by Wrocław Tech and LUT (Finland), is based on structured mobility, with students completing two semesters at each university. It focuses on innovation and value creation in the raw materials and mining sector, combining engineering with business and entrepreneurship. The programme develops T-shaped professionals who understand the full value chain and can integrate advanced technologies such as AI, IoT, automation, and digitalisation into practical, high-impact solutions.
As the first industry-driven 120 ECTS MSc of its kind in Europe, it equips students with technical, business, and socio-economic competencies, strengthens innovation and entrepreneurial skills, and prepares graduates to manage technology integration projects in an international environment.

ABOUT STUDIES

- **Duration:** 4 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** October 2026 and February 2027
- **Programme coordinator:**
  Anna Barbara Gogolewska PhD, Eng. Prof.
  (at Wrocław Tech)
  Maria Mamelkina PhD, (at LUT)



JOB PROSPECTS

Graduates become specialists in both Mining and Geology and Chemical Process Engineering, equipped to support the transformation of the mining sector through practical knowledge of advanced technologies and the ability to integrate innovation into viable business solutions. They develop strong technical, business, and socio-economic competencies, enabling them to drive innovation and technology integration. Alumni are prepared for careers in industry, finance, public institutions, consulting, research, or entrepreneurship, and are ready to work in international and intercultural environments.

ENTRY INFORMATION

Requirements: Bachelor's Degree – Bachelor of Science or Bachelor of Engineering (any incl. Geology Engineering, Mining Engineering, Mechanical Engineering, Energy-related Engineering studies etc.). Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: ENTREPRENEURSHIP, INNOVATION AND TECHNOLOGY INTEGRATION IN MINING (MEITIM)

Knowledge will be provided in the form of lectures, tutorials, laboratories, computer labs, project works and seminars.

SEMESTER 1

courses at LUT:

» Modelling of Unit Operations
» Advanced Process Design
» Research Methodology
» Circular Economy for Materials Processing
» Technology and Innovation Management Introduction
» Solid-Liquid Separation
» Elective Subjects

courses at WROCŁAW TECH:

» Operations Research
» Project Management, Appraisal and Risk Evaluation
» Environmental Management
» Digital Mine
» Computer Aided Geological Modelling & Geostatistics
» Engineering Geophysics
» Principles and Application of InSAR and GIS in Mining
» Occupational Health and Safety
» Foreign Languages

SEMESTER 2

courses at LUT:

» Fluid Dynamics in Chemical Engineering
» Process Intensification
» Current Issues in Enabling Technologies for Circular Economy
» Start-Ups and Venture Formation
» Academic Entrepreneurship
» Elective Subjects

courses at WROCŁAW TECH:

» Modelling of Unit Operations
» Advanced Process Design
» Research Methodology
» Circular Economy for Materials Processing
» Technology and Innovation Management Introduction
» Solid-Liquid Separation
» Elective Subjects

SEMESTER 3

courses at LUT:

» Project Management, Appraisal and Risk Evaluation
» Operations Research
» Environmental Management
» Digital Mine
» Computer Aided Geological Modelling & Geostatistics
» Engineering Geophysics
» Principles and Application of InSAR and GIS in Mining
» Occupational Health and Safety
» Foreign Languages

courses at WROCŁAW TECH:

» Fluid Dynamics in Chemical Engineering
» Process Intensification
» Current Issues in Enabling Technologies for Circular Economy
» Start-Ups and Venture Formation
» Academic Entrepreneurship
» Elective Subjects

SEMESTER 4

courses at LUT, WROCŁAW TECH:

» Diploma seminar
» Integrated Analysis of Deformations in Geomechanical Engineering
» Industrial Research Internship Project
» Field Academy Student Project
» Master Thesis

DESCRIPTION

Geomatics for Mineral Resource Management focuses on the process of resource modelling and mine management. Students will be taught in a variety of subjects related to the field mining and mineral resources. This includes financial, environmental, political as well as the legal aspects of national and international mining projects. In addition to the standard courses taught by staff from partner universities and industry experts, massive open online courses (MOOC's) are offered for the students. The MOOC's consist of a series of web-videos, which cover the content of an individual course. The educational content focuses on the following pillars: (1) Sensing technologies for mine data gathering, (2) Spatial (big) data management and visualisation and (3) Spatial (big) data analysis and modelling. The aim of the programme is to enable students to integrate these three pillars into innovative Geomonitoring concepts.
Students, who decide on the specialisation Geomatics for Mineral Resource Management, are, on default, set to study 2 semesters at Wrocław University of Science and Technology (1st and 4th semesters) and 2 semesters at TU Bergakademie Freiberg in Germany or two semesters at Montanuniversität Leoben in Austria (2nd and 3rd semesters) and are going to graduate with a double MSc diploma.

ABOUT STUDIES

- **Duration:** 4 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** February 2027
- **Programme coordinator:**
  Jan Blachowski PhD, DSc, Prof. (at Wrocław Tech)
  Jörg Benndorf PhD, DSc, Prof. (at TUBAF)
  Alexander Tscharf PhD (at MUL)

JOB PROSPECTS

Thus graduate of this master programme will be prepared to work in an international and multicultural environment in mining and exploration companies, technical supervision authorities, public administration offices, research and development institutions, everywhere where advanced and state of the art Interdisciplinary knowledge of mining and geology, computer aided design, geomatics are required.

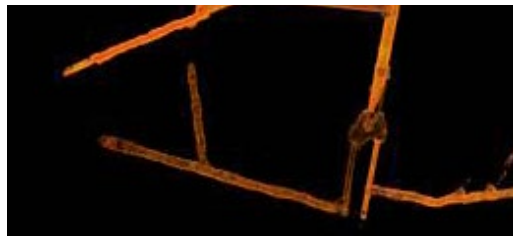
ENTRY INFORMATION

Requirements: the programme is meant for holders of a Bachelor's Degree in Mining and Geology as well as a Bachelor's Degree in Geodesy and Cartography or related engineering disciplines.

Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl



Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: GEOMATICS FOR MINERAL RESOURCE MANAGEMENT

Knowledge will be provided in the form of lectures, tutorials, laboratories, computer labs, project works and seminars.

SEMESTER 1 (WROCŁAW TECH)

» Principles and Application of InSAR and GIS in Mining
» Computer Aided Geological Modelling & Geostatistics
» Project Management, Appraisal and Risk Evaluation
» Engineering Geophysics
» Integrated Analysis of Deformations in Geomechanical Engineering
» Occupational Health and Safety
» Foreign language
» Elective course
» Mine Operation Scheduling and Costing

SEMESTER 2 (TUBAF)

» Applied Remote Sensing in Geosciences
» Underground Mine Surveying
» Geomonitoring
» Operations Management
» Geomodelling – Geostatistics for Natural Resource Modelling
» Foreign language

SEMESTER 2 (MUL)

» Spatial Planning
» Deposit Modelling and associated Software
» Underground Mining
» Mining Subsidence Engineering
» Geotechnical Monitoring and Instrumentation
» CAD-Constructions in Tunneling
» Mine Surveying Project Study

SEMESTER 3 (TUBAF)

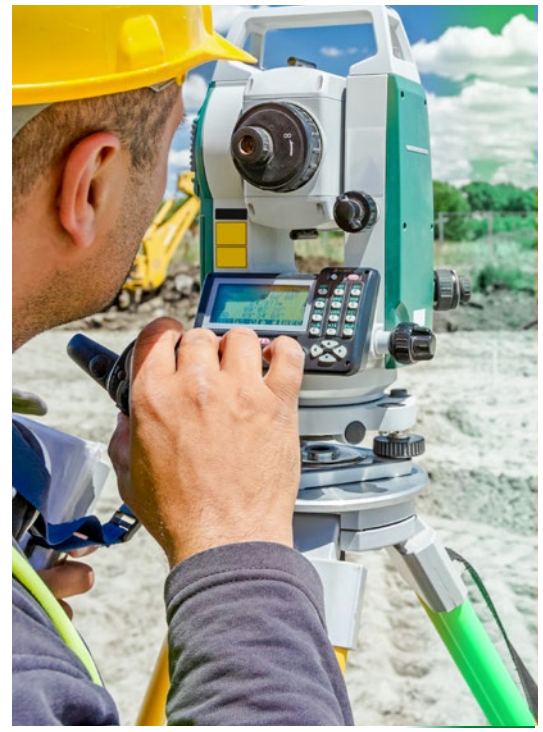
» Special Topics Geokinematics
» Applied Spatial Data Analysis and Modelling - Case Study
» Geomatics for Mineral Resource and
» Reserve Management
» Reclamation
» Human Resources Management & Organizational Behaviour
» Elective courses

SEMESTER 3 (MUL)

» Rock Mechanics – Open Pit, Slopes, Dams
» Lab in Rock Mechanics
» Applied Geodesy
» Selected Aspects of Engineering Surveying in Mining and Tunneling
» Mine Mapping
» Regulation of Mining Damages and Ensuring Land Use
» Risk Management in Mines
» Environmental Aspects of Mineral Extraction
» Internship
» Elective courses

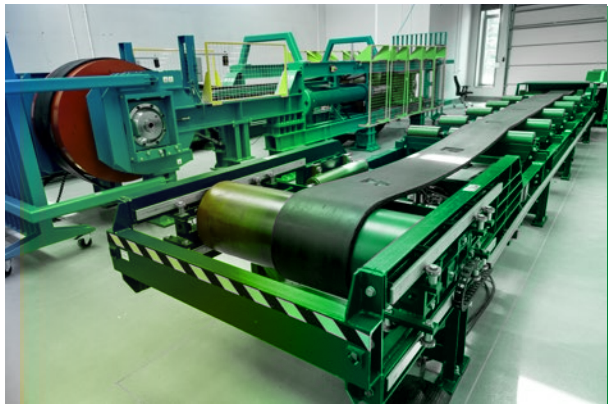
SEMESTER 4 (WROCŁAW TECH)

» Master's Thesis
» Diploma Seminar



DESCRIPTION

This is a joint MSc programme of Wrocław Tech and University of Miskolc (Hungary) formatted as a structured student mobility. Wrocław Tech students study two semesters in Wrocław (the first and the third semesters) while the second semester is offered by University of Miskolc. Students apply for an Erasmus Plus grant for the mobility period. In the third semester, the students write and defend their Master's thesis at Wrocław Tech.
Graduate profile: An alumnus becomes a specialist in two fields: geotechnical and environmental engineering, which is a very unique profile. Besides that, a graduate will be able to apply in-depth knowledge of basic sciences. The graduate will be able to manage and supervise teams, deal with high-risk situations and decisions. The graduate will be prepared to design technological processes, carry out research work, and work creatively.



ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** February 2027
- **Programme coordinator:**
  Gabriela Paszkowska, PhD,
  Prof. at Wrocław Tech
  gabriela.paszkowska@pwr.edu.pl

JOB PROSPECTS

The graduate will be prepared to work for enterprises, engineering supervision bodies, state administration, design offices and research units, where in-depth specialised knowledge of mining, geology and geotechnical engineering is demanded.

ENTRY INFORMATION

Requirements: Bachelor's Degree – Bachelor of Science or Bachelor of Engineering (any incl. Geology Engineering, Mining Engineering, Mechanical Engineering, Energy Related Engineering Studies, etc.).
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: GEOTECHNICAL AND ENVIRONMENTAL ENGINEERING

Knowledge will be provided in the form of lectures, tutorials, laboratories, computer labs, project works and seminars.

SEMESTER 1

- Theory and Practice in Geomechanics
- Computer-Aided Geological Modelling & Geostatistics
- Project Management, Appraisal and Risk Evaluation
- Engineering Geophysics
- Occupational Health and Safety
- Digital Mine
- Environmental Management
- Theory and Practice in Geomechanics
- Geochemistry
- Foreign Languages

SEMESTER 2

- Methods of Environmental Assessment
- Waste Incineration and Air Quality Protection
- Water and Wastewater Purification
- Environmental Geotechnics
- Chemical Technologies in Environmental Protection
- Environmental Risk Assessment and Remediation
- Soil and Water Chemistry
- Numerical and Optimisation Methods
- Basics of Waste Management
- Environmental Geology
- Basics of Environmental Processing

SEMESTER 3

- Foreign Languages
- Diploma Seminar,
- Master's Thesis
- Integrated Analysis of Deformations in Geomechanical Engineering
- Principles and Application of InSAR and GIS in Mining

DESCRIPTION

Graduate's profile: A graduate will possess abilities to use in-depth knowledge of problems within the domain of basic sciences, main-field-of-study and specialisation subjects. The graduate will be able to manage and supervise teams, deal with high-risk situations and decisions, and use competently the knowledge of law and economics. The graduate will be prepared to design technological processes, carry out research work and work creatively.

ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** October 2026 and February 2027
- **Programme coordinator:**
  Gabriela Paszkowska, PhD
  Prof. at Wrocław Tech
  gabriela.paszkowska@pwr.edu.pl

JOB PROSPECTS

The Mining Engineering graduate will be prepared to work for enterprises, engineering supervision bodies, state administration, design offices and research units, where in-depth specialised knowledge of mining engineering and geology is demanded.

ENTRY INFORMATION

Requirements: Bachelor's Degree – Bachelor of Science or Bachelor of Engineering (any incl. Geology Engineering, Mining Engineering, Mechanical Engineering, Energy-related Engineering studies etc.).
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: MINING ENGINEERING

Knowledge will be provided in the form of lectures, tutorials, laboratories, computer labs, project works and seminars.

SEMESTER 1

- Computer Aided Geological Modelling & Geostatistics
- Project Management, Appraisal and Risk Evaluation
- Environmental Management
- Engineering Geophysics
- Digital Mine
- Occupational Health and Safety
- Theory and Practice in Geomechanics
- Integrated Analysis of Deformations in Geomechanical Engineering
- Geochemistry
- Foreign Language

SEMESTER 2

- Excavation Design in Open Pit Mining
- Machinery Systems
- Tunnel and Underground Excavation Design
- Computer-Aided Mine Design
- Ventilation and Mine Fires
- Foreign Language

SEMESTER 3

- Principles and Application of InSAR and GIS in Mining
- Mineral Processing Systems
- Operations Research
- Diploma Seminar
- Master Thesis

DESCRIPTION

Geodesy and Cartography is a broad scientific and technical discipline encompassing the acquisition, processing, analysis, and visualization of spatial data (geodata) for applications in investment processes, spatial planning, property management, environmental protection, and other areas of the economy. The second-cycle (Master's) program provides students with advanced knowledge and competencies necessary to secure attractive employment, run their own business, occupy senior positions in public administration, and pursue further academic development within Doctoral Schools or other research institutions in Poland and abroad.

ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** February 2027
- **Programme coordinator:**
  Jan Blachowski PhD., DSc, Prof. at Wrocław Tech

JOB PROSPECTS

Graduates of Geodata Engineering are experts in collecting and interpreting geospatial data using modern technologies like GIS, LiDAR, UAVs, and machine learning. They combine advanced programming and spatial database skills with a solid understanding of geomorphology and environmental processes. Prepared for both public and private sectors, they excel at integrating interdisciplinary data to solve complex problems in geoinformatics, spatial planning, and environmental management.

ENTRY INFORMATION

Requirements: Bachelor's Degree – Bachelor of Science or Bachelor of Engineering (any incl. Geology Engineering, Mining Engineering, Me chanical Engineering, Energy-related Engineer ing studies etc.). Each application is assessed individually on its merits. If in doubt, please contact an Admis sion Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: GEODATA ENGINEERING

SEMESTER 1

- Assessment of Geospatial Data Quality
- Elements of Modern Physics
- Geodata Acquisition Methods
- Experiment Design
- Research Methodology
- Satellite Differential Radar Interferometry
- Digital Cartographic Model
- Foreign Language 2.1
- Psychology

SEMESTER 2

- Work Culture Shaping
- GNSS Positioning Techniques
- Application of Remote Sensing in Environmental Protection
- InSAR Time Series Analysis
- Selected Applications of Laser Scanning
- Elective Module:
- Path A. Programming: Object-Oriented Programming C/C++
- Path B. Geosciences: Hydrogeology with Elements of Engineering Geology
- Path C. GIS and Cartography: GIS in Geodiversity Modeling
- Foreign Language 2.2

SEMESTER 3

- Work Culture Shaping
- GNSS Positioning Techniques
- Application of Remote Sensing in Environmental Protection
- InSAR Time Series Analysis
- Selected Applications of Laser Scanning
- Elective Module:
- Path A. Programming: Object-Oriented Programming C/C++
- Path B. Geosciences: Hydrogeology with Elements of Engineering Geology
- Path C. GIS and Cartography: GIS in Geodiversity Modeling
- Foreign Language 2.2

DESCRIPTION

Environmental Quality Management – is a versatile field of study created for students eager to extend environmental protection general knowledge to higher level of proficiency. It offers their graduates possession of the comprehensive knowledge developed simultaneously with practical skills, focusing on the environmental protection issues with the engineering – related taste. Graduates are able to solve environmental engineering problems associated with sustainable development, circular economy, renewable energy resources, the pollution of environment and climate changes. Engineering skills possessed in planning, designing and conducting research projects allows our alumni to exploit their knowledge as highly skilled professionals solving problems related to water supply and sewer systems, wastewater processing, air protection, solid waste management and even materials science. We focus on biodegradable materials as a substituents for petroleum based plastics, smart renewable energy sector and other emerging technologies and processes being a huge step forward to existently utilised ones.

ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** October 2026
- **Programme coordinator:**
  Martyna Grzegorzek, PhD Eng

JOB PROSPECTS

The graduates will be qualified for working in research and development institutes, enterprises and governmental units related to environment protection issues. Knowledge and skills allows to take advantage to work in design offices and enterprises which are involved in: water supply, wastewater treatment, waste management, contaminated land remediation, broad spectrum of renewable energy technologies, air pollution control and abatement.

ENTRY INFORMATION

Bachelor's Degree in either of the following: Environmental Protection, Environmental Engineering, Chemistry, Earth Sciences.
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

CONTENT

Forms of teaching: lectures, laboratories, seminars, classes, computer classes, projects.

SEMESTER 1

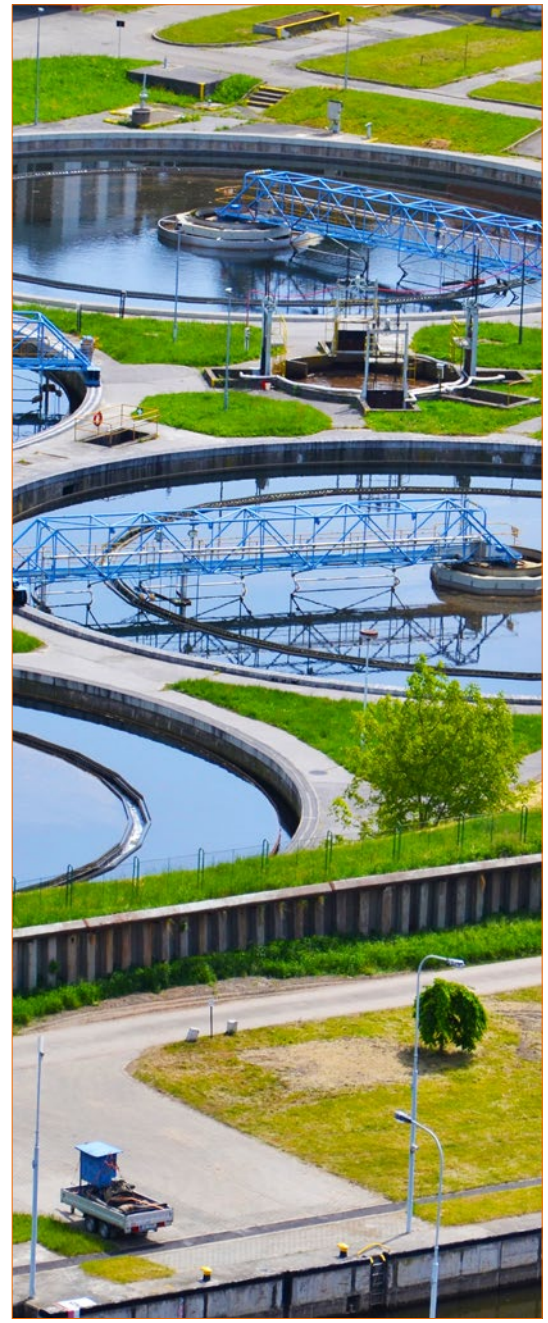
- Water Quality Management
- Water Treatment Technology
- Water Supply Systems
- Raw Materials Management
- Sanitary Biology
- Indoor Air Quality
- Autocad
- Environmental Chemistry
- Engineering Applications of Mathematical Statistics
- Strategic Management
- Ethics of New and Emerging Technologies
- Foreign Language
- Elective Course Block A: Biomonitoring or Methods and techniques of air pollutants measurement

SEMESTER 2

- Wastewater Treatment Technology
- Waste Gases Purification
- Environmental Toxicology
- Environmental Health Hazards
- Solid Waste Management
- Biodegradable Materials
- Reliability of Engineering Systems
- Sewage Systems
- Membrane Separation Processes in Environmental Protection
- Renewable Energy Systems
- Elective Course Block B: Automation in environmental engineering or Thermal comfort and microclimate
- Spatial Planning

SEMESTER 3

- Organization of Construction Works
- Building Regulations
- Diploma Seminar
- Master Thesis
- Environmental Management
- Foreign Language
- Elective Course Block C:
  Air pollutants and their sources or Modeling of water and sewage treatment processes



DESCRIPTION

Businesses today collect an incredible amount of data, from market transactions, customer service interactions, social media reviews, search engine entries, to demographics, and many more. Businesses also experience a rapid and continuous development of technologies and organizational behaviour that require high skills in ICT and data analytics. The Master of Business Intelligence (BI) programme is designed to provide students with cutting edge managerial knowledge and a strong foundation in both analytics – including computational statistics and machine learning – and core business areas, building a solid platform for a successful career. The BI curriculum focuses on how to analyse data in order to identify and predict patterns and on how to visualise and present results to support managerial decisions and lead to innovative thinking in today's organisations.
The Master of Business Intelligence programme is tailored for current Bachelor of Engineering students and recent graduates who plan to pursue a career in business analytics and management information systems, as well as computer programmers, mathematicians, physicists and engineers seeking career advancement or change. We not only welcome students from different backgrounds and cultures, but also see them as critical for developing innovative ideas. Set up and run by a team of top-ranking scientists, award-winning early stage researchers and successful professionals, the BI curriculum answers the market demand for tech-savvy graduates who can apply advanced computational tools to solve business challenges.

ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** February 2027
- **Programme coordinator:** Katarzyna Maciejowska, PhD
- **Contact person:** Yash Chawla, PhD

JOB PROSPECTS

The demand for business analytics is high. Graduates who complete the Business Intelligence programme will acquire computational skills and management expertise that the business world is actively seeking. Our programme prepares students for data-driven decision support that is crucial for today's business activities across a broad range of industries, including ICT, financial, energy and healthcare. The BI curriculum provides the skills to fill positions not only as business intelligence analysts, but also data analysts and consultants, revenue optimisation analysts, risk managers, market analysts and many more. Given that the students will have the opportunity to conduct research with affiliated faculty and senior staff, the programme also prepares for academic careers, offering a unique set of competences and invaluable experience related to decision support for energy markets and renewable generation, e-business logistics and trade, and healthcare systems.

ENTRY INFORMATION

Requirements: Bachelor of Engineering Degree. Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: BUSINESS INTELLIGENCE

The programme is build up from three blocks:
» Data description and analysis, where students learn how to visualize, and explore datasets using econometric tools, data mining and artificial intelligence
» Simulation techniques, where students learn how to simulate paths of business processes
» Management, where students learn how to use modern management techniques, such as product management or design thinking
The lectures are accompanied by laboratories and workshops (no traditional classes!).
Students apply BI methods using advanced programing environments such as Python, R and Matlab.

ACQUIRED SKILLS AND COMPETENCES

Students will learn how to:
» Use data analytics to stimulate business growth with quantitative and qualitative skills.
» Stay on top of the latest methods and approaches in computational statistics and machine learning.
» Use visualization software to identify trends, explore hypotheses, challenge assumptions, and create a more detailed, data-driven understanding of business activities.
» Simulate realistic future paths of all kinds of business processes.
» Leverage the power of data to make informed business decisions and thrive in a rapidly changing environment
» Conduct top-tier research and report the results to managers, peers and the public.
» Reach the right customers with the right products and communications.

DESCRIPTION

People are the most important resource in every organization. Machines and technology can be purchased or replicated, but without knowledgeable and skilled individuals, they hold little value. In today's world, competition is primarily between teams of people, and Human Resource Management (HRM) serves as a modern framework for managing such teams. This "soft technology" enables organizations to transform individual intellectual capital into HRM capital.
The HRM specialisation equips students with both theoretical knowledge and practical skills in strategic and operational human resource management across various types of organizations, including smaller teams within them. It also fosters expertise in leadership and team-building, all grounded in contemporary management, economics, and finance theories.
Additionally, students will develop the ability to utilize IT tools that support HRM processes. Emphasis will be placed on understanding business dynamics and effectively applying management techniques and tools. Furthermore, students will gain the skills to analyze economic and financial phenomena in a rapidly changing environment.
As part of the HRM specialization, students will also acquire hands-on experience in using IT tools and conducting data analysis to enhance HRM processes.

ABOUT STUDIES

- **Duration:** 4 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** October 2026
- **Programme coordinator:** Prof. Agnieszka Bieńkowska
- **Contact person:** Marta Nowakowska, PhD

JOB PROSPECTS

By completing the second-degree HRM specialization, graduates will gain the knowledge and competencies needed to lead various types of teams across different organizations—from international corporations to startups—as well as to work as human resource specialists.
The primary goal of this educational path is to equip graduates and professionals from various technical fields, including IT, mechanics, electronics and telecommunications, chemistry, construction, and other engineering disciplines, with the skills to manage and lead teams in their respective industries.
Graduates of this specialization will acquire both theoretical knowledge and practical experience through workshops and hands-on training, focusing on team dynamics and group functioning. Additionally, they will develop expertise in using human resource management tools to optimize team performance—not only in achieving business and project goals with high efficiency and effectiveness but also in ensuring the well-being of team members.

ENTRY INFORMATION

Requirements: Bachelor's Degree or Bachelor of Engineering Degree. Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: HUMAN RESOURCE MANAGEMENT

Forms of teaching: lectures, laboratories, tutorials, projects, seminars, research.

1ST GROUP OF COURSES:

modern concepts of human resource management in the field of selection, assessment and remuneration of personnel using the competency approach; management of the development and potential of employees, as well as their motivation and engagement; modern trends in the human resource area (strategic and international HRM, evidence-based approach, diversity management, and employer branding).

2ND GROUP OF COURSES:

a set of socio-managerial competences that are essential in working with and managing people, including: communication, public speaking and work on one's own image, working in a group and understanding group dynamics, social intelligence and the ability to predict and evaluate the behaviour of other people, leadership competences, including motivating, coordinating the work of a group and strategic thinking.

3RD GROUP OF COURSES:

General study courses that systematize and expand knowledge in modern management methods and concepts, as well as in economics and finance. The programme also includes humanities courses to enhance critical thinking and communication skills.

IMPORTANT!

While studying the HRM specialisation, students have the opportunity to work both individually and in a team. The practical forms of classes (i.e. projects, laboratories or workshops) cover over 50% of ECTS credits. Methods such as case study and problem-based learning are used.
Students have the opportunity to build specific tools supporting HR processes. Individual or group research projects are carried out to solve specific problems in the field of HRM.
The development of managerial and personal competences is based on the “learning by doing” approach, in practice it assumes the workshop nature of classes. Students develop specific skills, working in small groups on problems and projects, take part in simulations of situations and group processes.

Lectures are conducted in innovative interactive mode, some are conducted remotely.

At the end of the studies, students are obliged to prepare an MSc dissertation and pass a final (diploma) exam.

DESCRIPTION

Upon completion of the Master's programme, graduates will possess advanced scientific and engineering knowledge in renewable and low-carbon energy systems. The curriculum addresses contemporary global challenges, including energy conversion processes, energy storage technologies, advanced nuclear energy systems, low-temperature technologies, hydrogen production, control systems, and innovative approaches to energy systems modeling.

ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** February 2027
- **Programme coordinator:**
  Dorota Nowak-Woźny, PhD, DSc, Ass. Prof.

JOB PROSPECTS

Graduates will be well prepared and motivated to pursue lifelong professional development in the field of renewable and low-carbon energy systems and to adapt to emerging technologies, markets, and policy frameworks. They will be able to apply their knowledge effectively, work in interdisciplinary and multicultural teams and collaborate within diverse organizational and international contexts. In their professional activities and decision-making processes, they will be guided by principles of economic efficiency, environmental sustainability, and social responsibility.

ENTRY INFORMATION

Requirements: Bachelor's Degree in a related field.
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: RENEWABLE RESOURCES OF ENERGY

SEMESTER 1
- » Applied Mathematics
- » Physics - Selected Issues
- » Mechatronics and Control Systems
- » Selected Problems of Thermal-flow Processes
- » New Generation Energy Technologies
- » Physics of Renewable Energy
- » Modeling of HVAC Systems
- » Low-temperature Technologies
- » Finite Element Analysis
- » Foreign Language min. B2+

SEMESTER 2
- » CFD Simulations of Power Generation Units
- » Modeling of Energy Systems
- » Biomass and Biofuels in Energy Production
- » Solar Energy Conversion System
- » Fuel Cells and Hydrogen Production
- » Water Power Engineering
- » Wind Power Plants
- » Management Course (Elective)
- » Foreign Language (Next Language, Any Level)

SEMESTER 3
- » Heat Pumps
- » Thermonuclear Power Generation
- » Geothermal Power Engineering
- » Humanities Course (Elective)
- » Master Seminar
- » Master Thesis

DESCRIPTION

A graduate possesses detailed knowledge of devices and installations dedicated to cooling, reaching temperatures as low as -150°C. In the field of cryogenics, they are adept at handling temperatures below 120 K, even down to fractions of a Kelvin. They have skills in the design, implementation, and operation of both refrigeration and cryocooling systems. Additionally, a graduate can creatively apply modern design methods and is well-prepared to undertake PhD studies.

ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** February 2027
- **Programme coordinator:** Stefan Reszewski, PhD

JOB PROSPECTS

The graduates of the Refrigeration and Cryogenic programme will be prepared to work in all industrial branches that apply refrigeration and cryogenic technologies. In particular, our graduates will have a solid foundation to:

- design modern refrigeration and cryogenic units and installations,
- develop new solutions and methods for lowering the temperature,
- supervise operations in food cold stores, refrigeration and air conditioning installations, air rectification, technical gas production plants, natural gas liquefaction plants, and other refrigeration and cryogenic systems.

ENTRY INFORMATION

Requirements: Bachelor's Degree in Power or Mechanical Engineering or any related field. Each application is assessed individually on its merits. If In doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: REFRIGERATION AND CRYOGENICS

SEMESTER 1

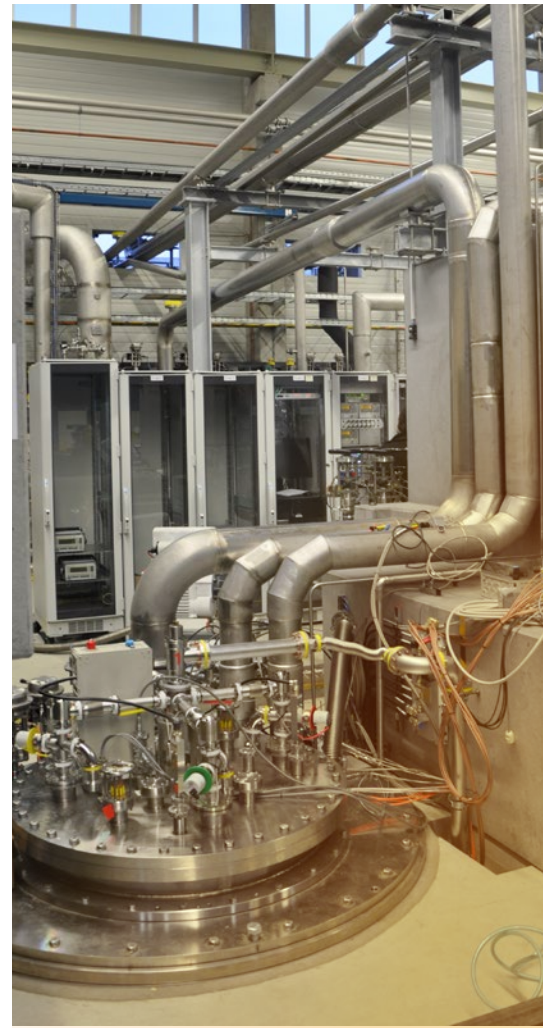
- Applied Mathematics
- Physics - Selected Issues
- Mechatronics and Control Systems
- Selected Problems of Thermal-flow Processes
- New Generation Energy Technologies
- Physics of Renewable Energy
- Modeling of HVAC systems
- Low-temperature Technologies
- Finite Element Analysis
- Foreign Language min. B2+

SEMESTER 2

- CFD Simulations of Power Generation Units
- Modeling of Energy Systems
- Cooling Systems
- Applied Cryogenics in Power Engineering
- Air Conditioning Systems
- Vapor-compression Refrigeration Systems
- Cryogenics
- Management Course (Elective)
- Foreign Language (Next Language, Any Level)

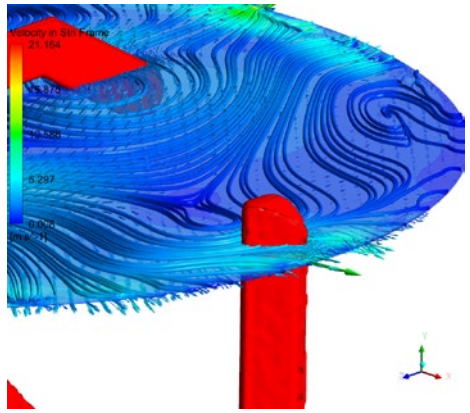
SEMESTER 3

- Sorption Refrigeration
- Cryogenic Systems and Applied Superconductivity
- Cold Chain
- Humanities Course (Elective)
- Master Seminar
- Master Thesis



DESCRIPTION

A graduate possesses the knowledge and skills in numerical methods for a wide range of energy/power applications. This knowledge will be very useful for performing complex thermal–flow simulations using both commercial and open-source software. Additionally, the graduate can utilize artificial intelligence, as well as the conventional approach, to solve energy/power problems.



JOB PROSPECTS

After graduation, the student will be prepared to solve problems in practically every area related to thermal and flow processes. Upon completing the specialization, you will be able to:

» program in a high-level structured language,
» perform mechanical and thermal-flow simulations using software such as ANSYS,
» conduct numerical analyses using open-source tools like OpenFOAM software,
» utilize artificial intelligence to control the operation of energy devices,
» analyze investments not only in technical terms but also in economic terms.

ENTRY INFORMATION

Requirements: Bachelor's Degree in a related field. Each application is assessed individually on its merits.
If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

» **Deadline for application**
» **Tuition fee**
» **Application fee**
» **English Language**
» **Requirements**

admission.pwr.edu.pl

ABOUT STUDIES

» **Duration:** 3 semesters
» **Mode of study:** Full time
» **Language of instruction:** English
» **Start date:** February 2027
» **Programme coordinator:**
Sławomir Pietrowicz, PhD, DSc, Ass. Prof.

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: COMPUTER AIDED MECHANICAL AND POWER ENGINEERING

SEMESTER 1

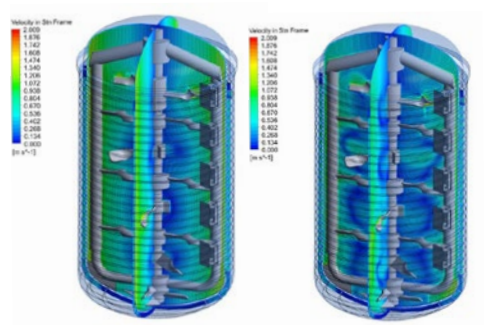
» Applied Mathematics
» Physics - Selected Issues
» Mechatronics and Control Systems
» Selected Problems of Thermal-flow Processes
» New Generation Energy Technologies
» Physics of Renewable Energy
» Modeling of HVAC Systems
» Low-temperature Technologies
» Finite Element Analysis
» Foreign Language min. B2+

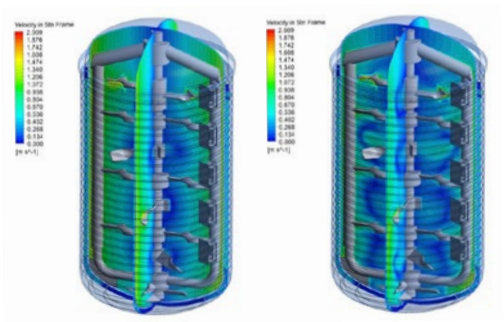
SEMESTER 2

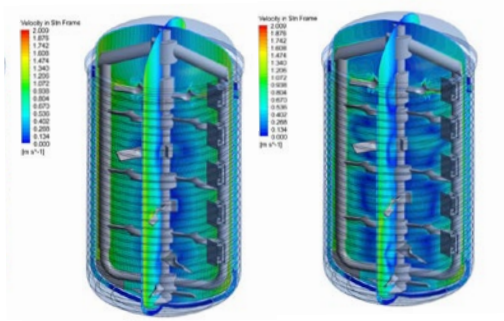
» CFD Simulations of Power Generation Units
» Modeling of Energy Systems
» Modeling of Combustion Processes
» Advanced Numerical Modeling Using OpenFOAM
» Fundamentals of Programming
» Advanced Data Processing
» Numerical Methods
» Management Course (Elective)
» Foreign Language (Next Language, Any Level)

SEMESTER 3

» Integrated Production Systems
» Thermodynamic Analysis of Energy Processes
» Artificial Intelligence
» Humanities Course (Elective)
» Master Seminar
» Master Thesis







DESCRIPTION

At the end of the Master's programme the students will have a sound base of general scientific knowledge in the field of Automotive Engineering. The curriculum encompasses contemporary issues related to automotive industry including innovative design, materials science, quality, safety and ecology. The students will be sufficiently equipped and motivated for a life-long qualification in the field of Automotive Engineering. They will be prepared to implement their knowledge and to cooperate within an organisation. In making decisions and performing their tasks, they will be guided by social, economical and ecological principles.

JOB PROSPECTS

The graduates will have the professional knowledge in the range of automotive engineering with particular concern in the latest trends in vehicle and engine construction as well as the standards of ecology and operation. The unique programme is designed to foster the development of the professional skills and to enable the graduates to work in the international and interdisciplinary teams in the field of automotive engineering.

ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** February 2027
- **Programme coordinator:** Sławomir Susz, PhD

ENTRY INFORMATION

Requirements: Bachelor's Degree. Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: AUTOMOTIVE ENGINEERING

SEMESTER 1

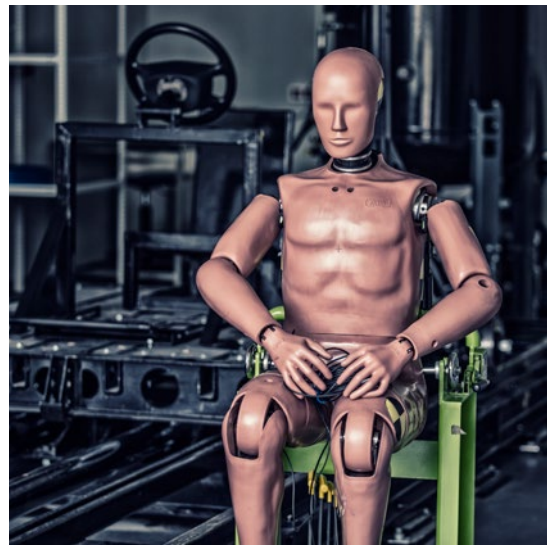
- Analytical Mechanics
- Applied Mathematics - Operational Methods in Automotive
- The basis of negotiations
- Communication for Engineers
- Design of Engineering Materials
- Energy Efficiency Design of Powertrain and Body
- Fatigue of Materials and Fracture Mechanics
- Machine and Device Control Systems
- Machinery Design Process
- Modelling of Multi-Body Systems
- Surface Engineering
- Testing of Vehicle Elements and Assemblies
- English language

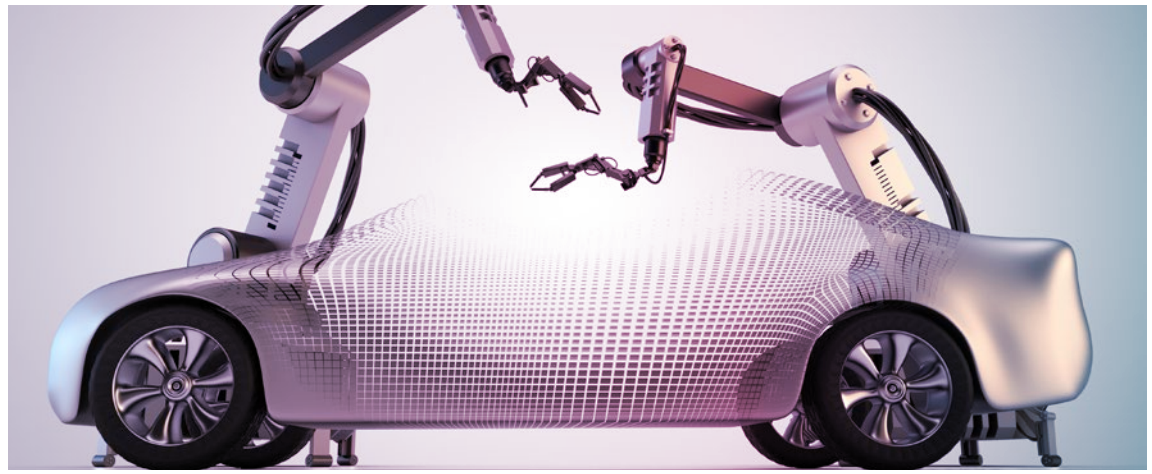
SEMESTER 2

- Developing Engine Technology
- Fluids Mechanics in Automotive Design
- Management for Engineers
- Non Destructive Evaluation in Contemporary Manufacturing
- Master Thesis I
- Alternative Drive Systems
- Chemistry and Green Fuels E
- Electronics in Car Vehicles
- Foreign Language II
- BLOCK: Project CAD/FEM

SEMESTER 3

- Automotive Expertises
- Diploma Seminar
- Ecology of Road Transportation
- Master Thesis II
- Safety of Vehicle





DESCRIPTION

The goal of these studies is to provide the students with knowledge and skills necessary to manage a production company. The curriculum encompasses issues related to company management, planning, organisation and control of manufacturing processes. The students learn about the latest methods of production management and IT techniques essential for the use of computer systems in company management. The knowledge and skills from many various disciplines such as: production organisation, quality management, logistics, computer science, economics, basics of law, mechanics and construction of machines, means that their education is universal and useful in production engineering and services in all sectors of the economy.

ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** February 2027
- **Programme coordinator:** Sławomir Susz, PhD

JOB PROSPECTS

The graduate of the programme has:
• extended knowledge about the management of production enterprises, including innovative companies of a global nature, knows the latest production technologies and development trends of modern production enterprises, knows the methods and techniques of production organisation as well as methods and tools for optimising production systems,
• the ability to design new production systems and improving existing companies, is able to effectively manage production resources as well as plan and control the implementation of production orders using advanced IT tools,
• the competence to undertake tasks in enterprises typical for such functions as: production manager, product manager, process manager, production engineer, process analyst, process development manager.

ENTRY INFORMATION

Requirements: Bachelor's Degree in: Control Engineering and Robotics, Mechanical Engineering and Machine Building, Transport, Management and Manufacturing Engineering or related.
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: PRODUCTION MANAGEMENT

SEMESTER 1
» Digitization and Robotization in Industrial Processes
» Factory Layout Design
» Invention Engineering
» Management and Engineering of Systems Reliability
» Modeling of Processes in the Enterprise
» Physicochemical Aspects of Manufacturing Processes
» Social Psychology
» Development of Enterprises Based on Digital
» Transformation
» Flexible Manufacturing Automation
» Foreign Language I
» Project Management
» Research Methodology
» Reverse Engineering
» Simulation of Manufacturing Processes

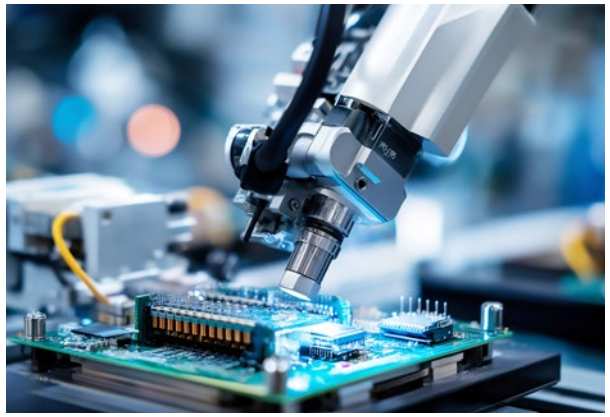
SEMESTER 2
» Innovative Manufacturing Technologies

SEMESTER 3
» Diploma Seminar
» Financial Analysis
» Innovative Manufacturing Technologies
» Strategic Management
» Additive Technologies in Production Engineering

» Knowledge Management
» Monitoring and Visualization in Manufacturing
» Thesis II
» Intelligent Methods in the Organization of Production
» Methods of Estimating the Carbon Footprint
» Selected Data Analysis Methods
» Social Product development
» Digitization and Robotization in Industrial Processes
» Foreign Language II

DESCRIPTION

This course will give the students multidisciplinary knowledge of electronics, optoelectronics, microwaves and telecommunications. It will enable them to obtain theoretical and practical knowledge in designing applied electronic systems based on analogue and digital techniques, lasers, fibres and microwave electronics as well as gain expertise in microprocessors, programmable logic applications and signal processing. Additionally, the students will gain laboratory experience and become familiar with work practices of research laboratories.



ABOUT STUDIES

- **Duration:** 3 semesters
- **Mode of study:** Full time
- **Language of instruction:** English
- **Start date:** February 2027
- **Programme coordinator:** Jerzy Witkowski, PhD

JOB PROSPECTS

The graduate will acquire the experience necessary for a professional career in industry, research units and universities, and will be prepared for 3rd level studies (PhD). They will gain substantial international experience working together with highest class scientists in the environment of prestigious laboratories. They will possess well above standard skills in English communication.

ENTRY INFORMATION

Requirements: Bachelor's Degree in Electrical, Electronic, Computer Engineering or related disciplines.
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

- **Deadline for application**
- **Tuition fee**
- **Application fee**
- **English Language**
- **Requirements**

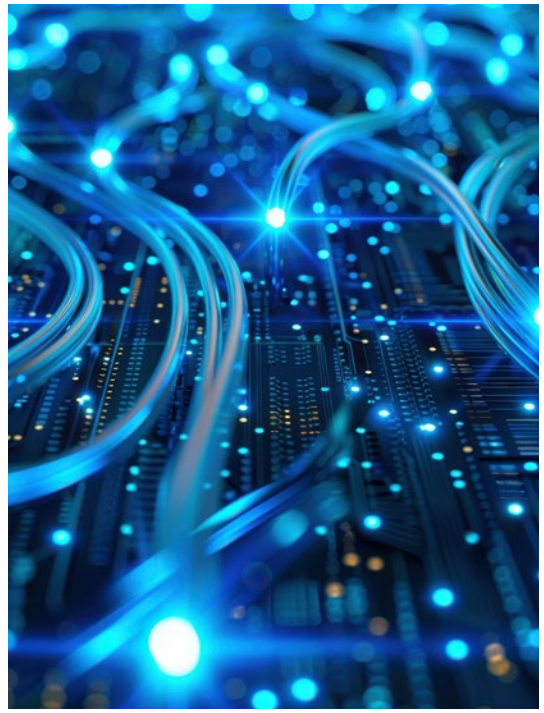
See more at:
admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl, phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: ADVANCED APPLIED ELECTRONICS

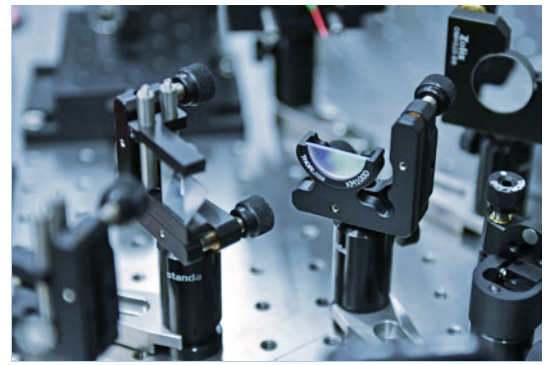
SEMESTER 1
» New Appr. in Electronics and Photonics
» Microcontrollers Programming
» Numerical Methods and Optimization
» Optical Fibers and Optocommunication
» Social Communication
» Foreign language
» Partial Differential Equations with Applications in Physics and Industry

SEMESTER 2
» DSP Architectures
» Hardware Programing
» Lasers and Applications
» Analog Peripherals of Digital Systems
» RF Circuits Design
» Machine Learning Methods
» Specialization seminar



SEMESTER 3
» Master Thesis
» LabView Programming
» Computer Networks and Systems
» Entrepreneurship
» Diploma seminar

ELECTIVE COURSES:
» Real Time Operating Systems
» Optics and Nonlinear Optics
» IoT Modules
» Advanced Objective Programming



DESCRIPTION

The Embedded Robotics programme integrates advanced robot control and system design with embedded electronics, artificial intelligence, and cyber-physical systems. Its goal is to equip students with strong scientific foundations and advanced practical skills for the analysis, design, and deployment of modern robotic and autonomous systems.
The curriculum addresses key technologies of contemporary robotics, including low- and high-level control, perception and robot vision, AI-based decision making, motion and task planning, communication, and human–robot interaction. Students gain a deep understanding of underlying theories, methods, and system-level design principles, supported by the use of modern engineering, simulation, and AI development tools, that enable them to develop reliable, intelligent, and adaptable robotic solutions.

JOB PROSPECTS

Graduates of the Embedded Robotics programme are well prepared for creative engineering careers at the intersection of robotics, embedded systems, control, and artificial intelligence. The programme also provides a strong foundation for research and scientific careers and doctoral (PhD) studies.
Typical career opportunities include:

» embedded and robotic systems designer/developer
» advanced control systems engineer for robotic and cyber-physical systems
» AI-enabled robotics and autonomous systems engineer
» robotics integration and deployment specialist
» research engineer or PhD student in robotics and automation

ABOUT STUDIES

» **Duration:** 3 semesters
» **Mode of study:** Full time
» **Language of instruction:** English
» **Start date:**
February 2027
» **Programme coordinator:**
Witold Paluszyński, PhD, Eng.

ENTRY INFORMATION

Requirements: Bachelor's or Bachelor of Engineering Degree in Electrical Engineering or related field. Minimum 210 ECTS.
Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail:

admission@pwr.edu.pl

» **Deadline for application**
» **Tuition fee**
» **Application fee**
» **English Language**
» **Requirements**

admission.pwr.edu.pl

Questions? Please contact the Admission Officers e-mail: admission@pwr.edu.pl,
phone: +48 71 320 37 11, +48 71 320 31 70, +48 71 320 44 39, +48 71 320 38 96

SPECIALISATION: EMBEDDED ROBOTICS

SEMESTER 1

» Robotic Programming Environments
» Artificial Intelligence and Machine Learning
» Embedded Systems
» Sensors and Actuators
» Control Theory
» Applied Logic
» Physics
» Foreign language

SEMESTER 2

» Applications of AI Models in Automation
» Mobile Robotics
» Control Theory for Embedded Systems
» Event-based Control
» Theory and Methods of Optimization
» Modelling and Identification
» Intermediate Project
» Specialization Seminar
» Foreign Language 2

SEMESTER 3

» Advanced Robot Control
» Social Robots
» Smart Factory
» Task and Motion Planning
» Developing Managerial Skills
» Entrepreneurship
» Ethics of New Technologies
» Diploma Seminar
» Master Thesis

DESCRIPTION

The programme, offered by the Faculty of Pure and Applied Mathematics and run in cooperation with the Hugo Steinhaus Center, is based on educational standards of the European Consortium for Mathematics in Industry (ECMI) as confirmed by the status of ECMI Teaching Centre obtained by Wrocław University of Science and Technology in 2014.
The curriculum is oriented towards real-life applications and industrial problems in educational style and contents. The goal of the studies is the real world applied mathematics education of specialists who are well prepared not only for work in the international financial institutions or enterprises, but also for any situation in which the creative thinking is needed. The graduates have no problems with finding good jobs in the finance and insurance or industrial sectors in Poland and abroad. The MSc diploma offers an opportunity to continue education at PhD studies.

The programme offers three main specialties:

» Financial and Actuarial Mathematics
» Industrial Mathematics
» Data-Driven Modelling

JOB PROSPECTS

The graduates will have obtained in-depth knowledge in mathematics and economics/finance; experience in pricing financial and actuarial contracts, modelling, simulation and optimisation, computational methods, data science and artificial intelligence.
They will be prepared for solving problems in the financial/actuarial and industrial sectors and gaining information from the literature and other sources. They will possess organizational skills and experience necessary for a professional career in research units, industry and at universities and colleges.

ABOUT STUDIES

» **Duration:** 3 semesters
» **Mode of study:** Full time
» **Language of instruction:** English
» **Start date:** February 2027
» **Programme coordinator:**
Janusz Szwabiński, PhD, DSc

ENTRY INFORMATION

Requirements: Bachelor's or Master's Degree in Applied Mathematics, Control Engineering and Robotics, Economics, Electronics, Electronics and Telecommunications, Computational Physics, Technical Physics, Physics, Computer Science, Computer Science and Econometrics, Industrial Computer Science, Applied Computer Science, Data Engineering, Quantum Engineering, Systems Engineering, Mathematics, Mathematics and Statistics, Mathematics in Technology, Computational Mathematics, Teleinformatics, Telecommunications and related domains obtained either in Poland or abroad. Each application is assessed individually on its merits. If in doubt, please contact an Admission Officer, e-mail: **admission@pwr.edu.pl**

» **Deadline for application**
» **Tuition fee**
» **Application fee**

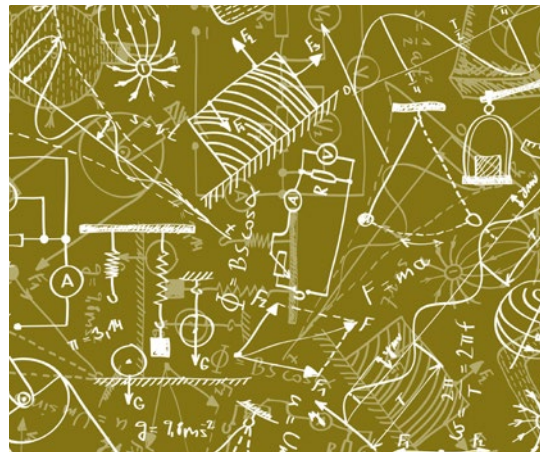
ELECTIVE COURSES

» Financial Risk Management
» Computational Finance
» Non-life Insurance Mathematics
» Risk Management in Insurance
» Actuarial Mathematics for Life Contingent Risks
» Numerical Methods in Differential Equations
» Nonlinear Dynamics, Chaos and Fractals
» Introduction to Inverse Problems
» Operations Research
» Perturbation Methods
» Physics Informed Neural Networks for Forward and Inverse Problems
» Data Processing with Rust
» Machine Learning for Data Analytics
» Analysis of Unstructured Data
» Estimation Theory
» Advanced Topics in Dynamic Games
» Large Language Models
» Reinforcement Learning in Multi-Agent Systems
» Biomathematics
» Stochastic Processes in Natural Sciences I
» Stochastic Processes in Natural Sciences II



PREPARATORY LANGUAGE COURSES

DESCRIPTION

The Department of Polish Language for Foreigners offers courses in Polish language and Polish culture on different levels – starts with A1 level and usually ends with B2. They are intended for candidates who wish to prepare for future studies at all academies in Poland as well as for those who want to learn Polish intensely. They include 20 lessons of Polish language per week (5 times a week, 4 lessons a day).

The first term contains 300 hours of Polish language, and so does the second term. The students also learn supplementary subjects preparing them for their further studies. The supplementary subjects can be selected according to the students' needs out of the following: mathematics, physics, computer sciences, geography, knowledge of Polish culture and history. The students start learning the specialisation courses on the advanced level in the winter term and on the elementary level – in the summer term. The specialisation subjects are taught in Polish.

The courses, thanks to the fact that they are carried out on different levels, guarantee a communicative dexterity in both official and unofficial situations. At the same time, the courses prepare the candidates for studying on different faculties. The students improve basic linguistic competences: listening comprehension, reading comprehension, speaking and writing different kinds of text. Additionally, some lectures and classes on Polish history and culture are carried out in Polish and English.

The course finishes with a written and oral examination in Polish language and with examinations in all chosen subjects. The Department of Polish Language for Foreigners provides also additional activities, such as: tourist tours to the most interesting regions of Poland, visiting some historical places in Wrocław and participating in different cultural events. Taking part in the course, the students learn about important traditions and customs of the Poles.

ENTRY INFORMATION

The university admission procedure based on secondary education certificate or degree certificate. Each application is assessed individually on its merits. For further inquiries, please contact us at: **welcome@pwr.edu.pl**

CONTENT

The curriculum of learning Polish as a foreign language on the elementary level A includes individual-connected topics primarily (personal data, education, general look, family relations, leisure time activities, health, etc.). Subsequent subjects include: one's surroundings (both immediate: living place, students' hostel, etc., and more distant: city and its institutions), everyday routines, plants, animals, the weather and climate.

THE GRAMMATICAL MATERIAL INCLUDES:

- declination of nouns, adjectives, pronouns and numerals;
- verb inflexion, transitive and intransitive verbs, voices and moods of verbs, impersonal forms of verbs, modals and verbs connected with movement;
- comparison of adjectives and adverbs;
- classifying words into different parts of speech;
- syntax of a single and compound sentence, double negation, punctuation.

The curriculum includes also typical communicative situations.

COURSES:

- Polish history has been presented from the oldest to the contemporary times. The course has been divided into parts determined by dates of great significance to the society and the state.
- Introduction to computer science and basic programming includes understanding syntax, variables, and fundamental data types in Python.
- Participants of mathematics classes will have an opportunity to get to know the language and terminology used in mathematics. They will also have a chance to make up for the secondary school knowledge they miss (e.g. digits, geometric figures, fractions, mathematical actions, functions, sequences, etc.).
- The purpose of the physics course is giving participants an opportunity to understand the phenomena of the surrounding world and nature, the structures of physics and its connections with other natural sciences (kinematics, dynamics, thermodynamics, electrostatics, optics, contemporary physics, electric current).

DESCRIPTION

The Department of Foreign Languages at Wrocław University of Science and Technology offers preparatory courses to foreigners who want to study BSc and MSc courses in English at Wrocław University of Science and Technology. The course includes 600 hours of English (20 hours of English per week 5 times x 4 hours a day). The students can also learn suplementary subjects preparing them for their further studies as well as Polish language and culture.

To start the course of English students should be at intermediate level B1 as set forth in Common European Framework for Language, Teaching and Assessment. The aim of the course is to help the students improve their language skills and reach B2 level and to introduce English for academic purposes in order to enable them to follow the university courses in English.

The preparatory English course lasts for the whole academic year (from October to June) and is divided into two semesters. In the first semester the students learn general English with professional language elements. The second semester covers a balance of language skills (speaking, listening, reading, writing), grammar and vocabulary with a special focus on academic language.

In addition to language training, students can select supplementary subjects based on their academic needs. These subjects include mathematics, physics, computer science, and Polish language. Specialization subjects are taught in English.

The course builds the skills required for understanding lectures, tutorials, research papers and written assignments in English. At the end of the course students take examinations in English, selected supplementary subjects. The English examination is at B2 level and consists of two parts, a written test and an interview. The participants will be provided with coursebooks and other teaching materials to be used at the preparatory English course all free of charge. The final examination tests listening and reading skills, speaking, writing, knowledge of grammar and vocabulary.

The exam registration fee is included in the price of the course. Throughout the academic year the students will be provided with an opportunity to go on 1-2 day trips to discover the most beautiful places in the region.

The students will also be able to take part in talks and lectures about history of Wrocław and Poland, cultural events, technical English and more.
